4 Challenges Investors Face & How  
YieldShield Aurum Solves Them

## A Guide for the Underserved Middle

For Accredited Investors with **\$1M–\$25M**  
Allocable Capital Seeking Capital Resilience  
& Cashflow Stability

Wellcome Capital

# More About the Underserved Middle

Having \$20M should get you access to elite wealth management but the truth is: it doesn't. You get retail offerings dressed up in expensive clothes.

At Wellcome Capital we are disrupting traditional wealth management: a system dominated by conventional wisdom, not built for meaningful wealth.

We serve this exact audience, allocating \$1M - \$25M, seeking wealth preservation, protection and stable cashflow, rather than speculative upside.

This guide shows how [YieldShield Aurum](#) solves the four most common investment challenges for people just like you.

If this resonates, request private vault access

# Challenge 1: Your Hard-Earned Capital at Risk

## The Problem:

Your hard-earned capital is exposed to downside risk: market drawdowns, counterparty failure, or operational issues that can erode principal exactly when you need stability most.

## YieldShield Aurum Solves It:

- ✓ Capital is fully protected from day one. Never lent, never collateralized, never depleted.
- ✓ For \$1M+ allocations, premium insurance keeps your funds in insurer's same-bank account with full coverage (modest fee, your responsibility).

# Challenge 2: Unpredictable Cash Flow

## The Problem:

Many alternatives deliver returns irregularly, tied to exits, market events, and performance fees; making reliable monthly cash flow difficult for lifestyle, reinvestment and planning.

## YieldShield Aurum Solves It:

- ✓ Fixed interest rate. Contractual monthly income, paid on the settlement date from locked-in gold transactions.
- ✓ No J-curve, no waiting for realizations, no guessing. Just consistent monthly flow you can plan around.
- ✓ Predictable. Reliable. Yours to count on.

# Challenge 3: Money Tied Up for Years

## The Problem:

Capital is often locked away often 5–7 years (or longer) with limited exit visibility, creating limitations and opportunity costs when you need flexibility.

## YieldShield Aurum Solves It:

- ✓ The structure activates in 60–90 days and operates on a 12-month term. Short enough for agility, long enough for meaningful participation.
- ✓ Written notice prior to any 12 month anniversary ensures orderly exits
- ✓ Your money. Clear timeline.

Ready to control your timeline? » Request Vault

# Challenge 4: Correlation & Trust

## The Problem:

Your portfolio often moves in tandem with stocks and bonds. When markets drop, everything hurts. Many gold-related opportunities involve junior miners, exploration risk, or platforms you can't fully trust.

## YieldShield Aurum Solves It:

- ✓ A proven 20+ year gold operation. Physical gold, assayed on site, transacted same-day at pre-agreed rates under renewed (Goldbod) oversight.
- ✓ Capital protected via premium insurance (\$1M+). Borrower always uses their own credit facility to execute gold transactions.
- ✓ Fixed interest rate, uncorrelated to markets. Proven track record. Quiet confidence in the structure.

Ready for uncorrelated confidence?

# YieldShield Aurum

## Four Challenges YieldShield Aurum Solves

Capital at Risk → Full principal protection from day one via premium insurance. No exposure, no erosion.

Unpredictable Cash Flow → Fixed interest rate.

Contractual monthly income paid on settlement date.

Cash flow you can plan around.

Money Tied Up for Years → 60–90 day activation, 12-month term, exit written notice prior to term expiry.

Correlation & Trust → proven 20+ year gold operation under renewed oversight, independent of public equity volatility and duration risk. Structure you can trust.

If these challenges sound familiar, the private vault is open: full details and sample loan agreement available.
