- NEUTRO KING

PACKING & INTRO OF PRODUCTS

SSG-MILKY SWEET

- Multiple Cutting
- Broad Long Leaf
- Strong Stem & Roots
- Height 10' - 14' Feet
- Dark Green Colour
- Sweet Like Sugar Cane & Softy

SSG-MASTER HONEY

- 2-3 Cutting
- Broad Long Leaf
- Height 9' - 13' Feet
- Juicy & Softy
- Disease & Pest Tolerant

SHRI JI-57 (SINGLE CUT SORGHAM)

- Very High Green Fodder Yield
- Height 10' - 15' Feet
- Strong & Tall Plants
- Heat & Drought Tolerant
- Highly Nutritious & Juicy Fodder
- Disease & Pest Tolerant
- Fast Growing Variety

MAIZE SG-222 (DOUBLE CROSS)

- Duration 80 - 95 Days
- Height 6' - 9' Feet
- Strong and vigorous plant growth
- Good stem strength, less lodging
- Suitable for different soil types
- Performs well in varied climate conditions

MAIZE SPEED-777 (DOUBLE CROSS)

- Duration 60 - 80 Days
- Height 6' - 9' Feet
- High yield stability even in stress conditions
- Better adaptability to different regions and soils
- Good resistance to common pests and diseases

MAIZE SG-2246 (SINGLE CROSS)

- Duration 100 - 105 Days
- Height 7' - 9' Feet
- High yield stability even in stress conditions
- Better adaptability to different regions and soils
- Good resistance to common pests and diseases
- Hybrid developed by crossing two pure inbred lines
- Very uniform plant growth

MAIZE SG-5577 (SINGLE CROSS)

- Duration 85 - 95 Days
- Height 6' - 8' Feet
- Uniform cob size and shape
- Tight husk cover
- Good pollen shedding and silk synchronization
- High harvest index

MILKY SWEET KING

(HY. MULTI CUT BAJRA)

- Hybrid high-yielding forage variety
- Multi-cut type (5–7 cuts possible)
- Fast growing with quick regrowth after cutting
- Tall plants with thick, juicy stems
- Broad, soft and dark green leaves
- Strong root system and lodging tolerant
- Suitable for summer & rainy season sowing

STAR-10 (HAADU BARSEEM)

- High yielding improved Barseem variety
- Multi-cut type (4–6 cuts possible)
- Fast growing with quick regrowth after cutting
- Fine, soft and succulent stems
- Broad, tender and deep green leaves
- Strong root stem with good tillering

GREEN GOLD (IMPORTED GRASS)

- High yielding imported fodder grass variety
- Fast growing with quick establishment
- Multi-cut type with excellent regrowth capacity
- Fine, soft and leafy grass
- Bright green, long and narrow leaves
- Strong root system with good ground cover
- Performs well in cool & mild climate
- Suitable for winter season sowing

KIRSHMA-555 (RESEARCH MOONG)

- Duration 60-65 days
- Early maturing variety
- Short duration crop – saves time and cost
- Yield 8 - 12 per acre
- Pods are medium to long with bold grains
- Shiny green, attractive seed colour
- Good resistance to common moong diseases
- Adaptable to different soil conditions

SG-746 (HYBRID MUSTARD)

- Duration 120 - 135 days
- High-yielding & Good oil content
- Medium to early maturity
- Strong, erect plant type
- Profuse branching with uniform growth
- Long siliqua (pods) with more seeds per pod
- Bold seed size with attractive colour
- Performs well under irrigated and rainfed conditions

SG-722 (HYBRID MUSTARD)

- Duration 125 - 140 days
- Very high grain yield potential
- Higher oil content improves profitability
- Uniform maturity ensures easy harvesting
- Better tolerance to common mustard stresses
- Suitable for timely sowing conditions
- Higher returns compared to local varieties
- Ideal for commercial mustard cultivation
