Friendly with environment

Easy to construct

Easy to clean

**Absolutely waterproof:** This feature is the most outstanding of the composite feature. Therefore, composite material is very durable and suitable for rainy weather in tropical countries.

**Absolutely anti-termite:** Due to the main PVC resin ingredient, you don't have to worry about termite problems of the composite material.

**Anti flame-spread:** The flame will be shut when the flame source is cut, therefore the material prevents the flame from spreading.

**Non-toxic:** The material has been tested and proved to contain no formaldehyde and qualified for various certifications such as RoHS, REACH, ...

**Recyclability:** Wastes/Scraps from composite doors can be shredded and recycled for use in the next production stage

**Environmentally friendly:** With recyclability, Pima composite door can actively reduce plastic waste and deforestation.

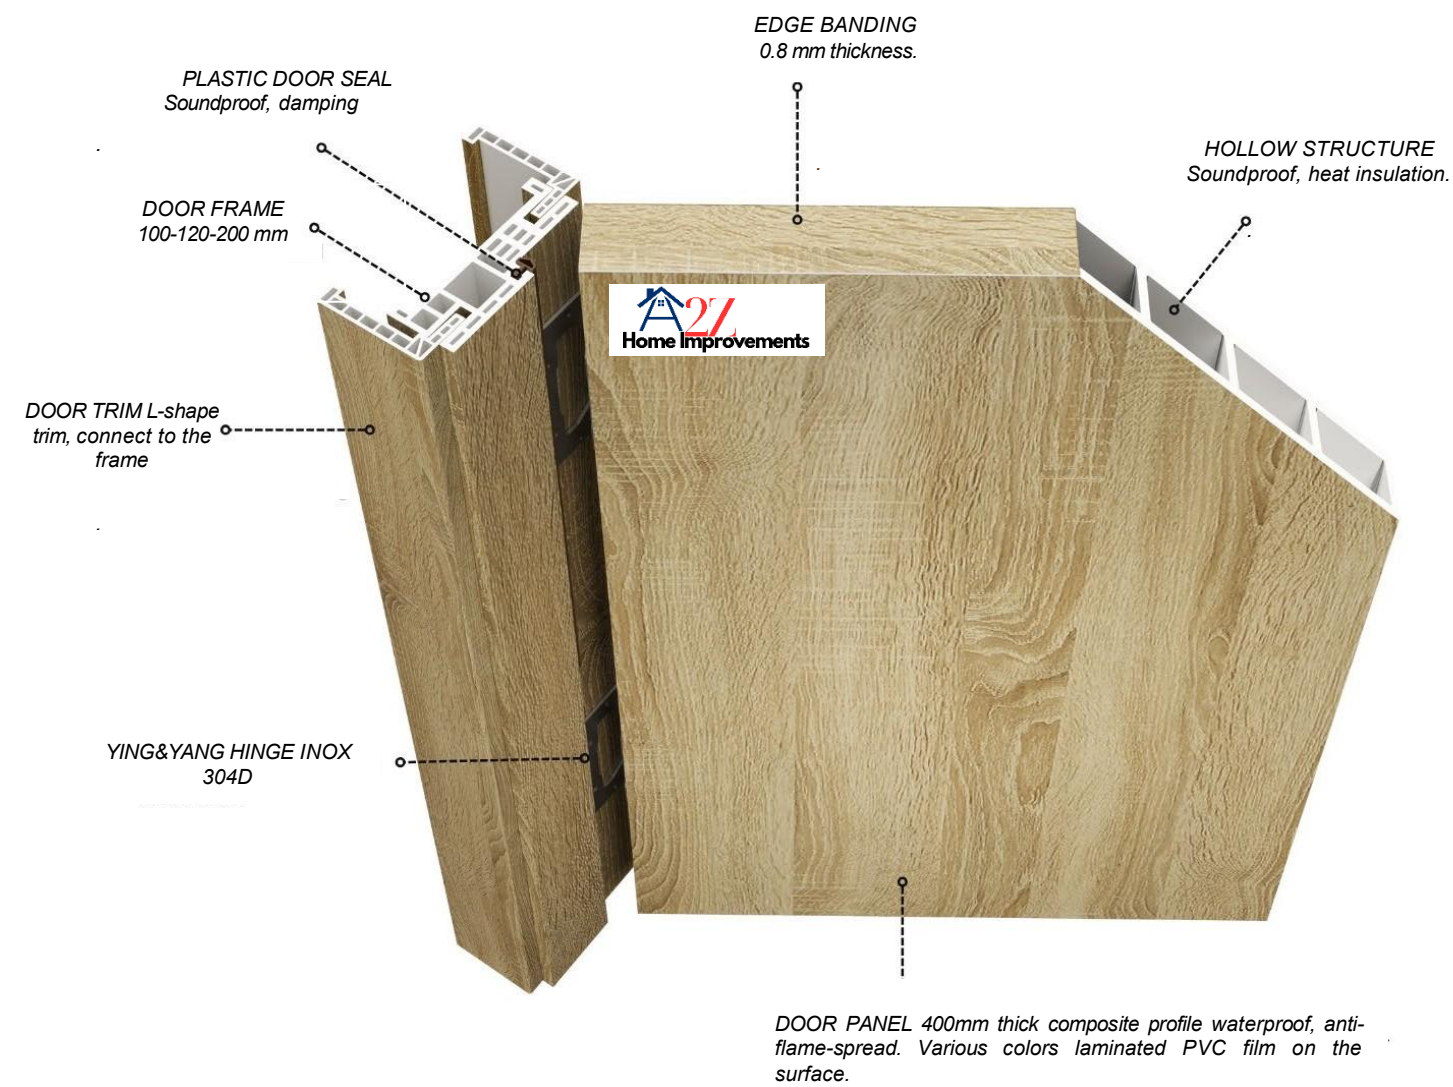

**Easy construction:** The material is easily processed with common equipment such as staging saw, screws, nails, CNC machines, ...

**Easy cleaning:** You just need a wet towel to clean all the dust on the surface.
