Volunteer Safety Guidelines: Carmel Owls Volunteers must adhere to the following Safety Guidelines to minimize the chances of injuries and to minimize any inconvenience to locals and visitors while our projects are underway. Prior to participating in any Carmel Owls project, your Project Manager will review these guidelines with you and will have you acknowledge receipt by signing this document.

Your safety and the safety of those around you is our number one priority. Whenever conducting any activity, always consider whether you are taking any risk of injury to yourself or others. If you are in any doubt, do NOT undertake the task.

1. Always be aware of your surroundings and the effect that your work could be causing to yourself and others. Please pay attention and focus on your task. Inattention and not being aware of your surroundings can cause injury to yourself and others.
2. When installing an owl platform always use Carmel Owls traffic cones to alert passersby that our project is in progress. Have your Project Manager put out cones to alert for an existing hazard.
3. Always wear clothing that can protect you from the environment in which you are working. This includes sturdy shoes, jeans, long-sleeve shirts, work gloves and a hat to protect you from the sun. It is your responsibility to wear protective clothing.

Always use the proper tool for the job and use the tools properly. Seek out guidance if you are unsure of which tool to use or how to use the tool including the use and positioning of a cherry picker also known as a boom lift. Careless use can cause serious injury. Never leave your tools in areas that could cause someone to trip on them or be hurt.

4. Work in a team of two people, when at all possible and it makes sense, to help increase the level of safety for the participants and to call for help if there is an accident.
5. Wear eye protection especially when installing an owl platform which is typically elevated above you. Branches of trees can spring back or fall off, or loosened bark or debris can enter the eyes causing serious injuries. Please ask the Project Manager for any protective gear that you may not have.
6. Do not lift heavy objects that might strain your back or your legs including an owl platform or the cherry picker trailer. Any lifting should be done using your legs, not your back. Get assistance on site to help with any objects that you cannot handle.
7. Be cautious when working near traffic in the roads or on the shoulders of roads. Always wear safety vests with reflective colors and face traffic to be aware of approaching cars. Wait until traffic has cleared before continuing work. If working in a defined area, place safety cones out to alert drivers. You can get cones and vests from your project manager before starting your task.
8. Do not climb trees. Do not walk on the coastal bluffs.
9. I have read the above Safety Guidelines and agree to follow them whenever participating in a project for Carmel Owls.
