Product Data Sheet

Viscor 30

PRODUCT DESCRIPTION

Visco 30 is a solid amorphous olefin copolymer specifically engineered to function as a Viscosity Index Improver (VII) in engine oil formulations. It delivers outstanding shear stability and enhances low-temperature performance, making it ideal for use in both passenger car motor oils (PCMO) and heavy-duty engine oils (HDEO). Its molecular design ensures consistent performance across a broad temperature range, improving lubricant efficiency and durability.

FEATURES & BENEFITS

•Exceptional shear stability and low-temperature performance.
•Rapid solubility in a variety of base oils.
•Enhanced pour point properties when combined with suitable pour point depressants.
•Broad base oil compatibility — optimally suited for SN150, SN130, and SN100.

RECOMMENDED DOSAGE (WT%)

Visco 30 may dissolved in a wide range of base oil at 8.0% wt to produce a liquid Viscosity Index Improver.
This chart displays the typical treat rates for the additive:

SAE J300 Viscosity Grade Liquid Visco 30 treat % wt	
10W 40	9.2 - 11.2
15W 40	8.5 – 9.5
20W 40	5.8 - 7.8

APPLICATIONS

• Passenger Car Motor Oils (PCMO)
• Heavy-Duty Diesel Engine Oils (HDEO)
• Multigrade Engine Oil Formulations

TYPICAL CHARACTERISTICS

Item	Specification
From	Solid Polymer
Appearance	Clear Polymer
Density 15°C, g / ml	0.876
Propylene Content	% wt: 50 max
Mooney Viscosity ML (1+4) 100 °C	21-27
Ethylene Content %wt	47.8 - 52.8
ENB (DCPD)	Nil
Molecular Weight Distribution	Narrow
Volatility %S	0.75
Vanadium Content mg/kg %≤	14
Ash content %S	0.1
SSI(Kurt Orban)	30

Solubilization Process for Visco 30

1. Preheat and Preload

Charge 80–85% of the total base oil to the dissolving tank and preheat to 110–120°C before polymer addition. This reduces the ramp-up time to the dissolution temperature.

2. Mixer and Nitrogen Setup
Ensure the mixer impeller is submerged. Begin mixing and nitrogen purge as soon as oil covers the impeller to prevent oxidation.

3. Additives Addition
Add oxidation inhibitor (BHT) immediately after mixing begins to ensure uniform dispersion.

4. Ramp-up Temperature & Polymer Addition
Simultaneously heat the oil to 140–145°C and begin continuous feeding of chopped polymer in small, timed increments. Avoid polymer clumping by ensuring dispersion rate matches mixing capacity.

5. Controlled Dissolution Phase
Once all polymer is added, maintain temperature at 140°C, increase agitation speed slightly (if safe) to enhance mass transfer, and hold for 3.5–4.5 hours, reducing the dissolution phase duration.

6. In-process Viscosity Monitoring
Use inline viscosity monitoring, if available, or take samples hourly to track polymer dissolution progress. This avoids over-processing.

7. Final Viscosity Adjustment
Once dissolved, adjust to target viscosity using the remaining 15–20% of base oil. Mix thoroughly for 30–45 minutes (down from 30–60 minutes) and confirm homogeneity.

8. Final Filtration and Transfer
Transfer the finished product to the storage tank through a cartridge filter (25 micron). Use pre-warmed transfer lines to avoid polymer precipitation or gel formation.

Properties of 8.0% wt, Visco 30 dissolved in Exxon Mobil 150 N AP/E

Color ASTM D 1500 :	1.1
Density 15°C: g / ml :	0.87
Flash point ◦C (PMCC) :	236
Kint Visc100°Cmm2/s :	1,368
SSI 1 (Bosch) ASTM D 6278 :	30
Thickening power :	1 at 100°C / cSt 8.02

Handling Information

Max dissolving Temp: 150◦C with nitrogen blanketing shelf life: 36 months.

SAE 20W – 50 Demonstration Oil

Composition	Function	% wt
Visco 30	VI Polymer	8.1

PACKING, STORAGE & TRANSPORTATION

This product is classified as non-flammable, non-explosive, and non-corrosive. When storing, handling, transporting, or using this product please refer to the SH/T 0164 standard and the product's Material Safety Data Sheet (MSDS) for proper guidelines.
Maximum storage temperature: Do not exceed 75°C.
Recommended long-term storage temperature: Should not exceed 45°C.
For detailed information on safety, health, and environmental precautions, please consult the MSDS.

PACKAGING OPTIONS

Available in bulk and drums.
