ISO/IEC 27001:2022 ISMS Master Class

- **Dual Certification in One Program**
 - Earn both Lead Implementer and Lead Auditor credentials in a single 5-day intensive course.
- **Comprehensive Coverage of ISO/IEC 27001:2022**
 - Master the latest requirements, updates and practical applications of the standard.
- **Hands-On Workshops & Case Studies**
 - Apply concepts through interactive exercises, role-plays and real-world scenarios.
- **Expert Faculty**
 - Learn from seasoned ISO/IEC 27001 practitioner with global consulting and auditing experience.
- **Globally Recognized Credentials**
 - Certifications that enhance career prospects and credibility across industries.
- **Balanced Approach: Theory and Practice**
 - Structured sessions combining conceptual clarity with practical implementation and audit skills.
- **Accelerated Learning Path**
 - Achieve two certifications in five days, maximizing value.
- **Flexible Delivery Options**
 - Available in classroom and virtual instructor-led formats to suit organizational needs.
- **Networking Opportunities**
 - Connect with peers, auditors and implementers from diverse industries
- **Industry-Relevant Case Studies**
 - Drawn from diverse sectors such as IT, finance, healthcare, and manufacturing to showcase real-world ISMS challenges.
- **Interactive Learning Environment**
 - Group discussions, role-plays, and scenario-based exercises to reinforce understanding.
- **Post-Course Support**
 - Access to templates, checklists, and guidance materials for continued application after training.
- **Career Advancement Pathway**
 - Certifications open doors to roles such as ISMS Consultant, Compliance Manager and Auditor / Lead Auditor.
- **Global Best Practices**
 - Learn how organizations worldwide implement and audit ISMS effectively.
- **Holistic Skill Development**
 - Focus not only on technical compliance but also on leadership, communication and stakeholder management.
- **Continuous Professional Development (CPD)**
 - Earn CPD credits to support ongoing professional growth and recognition.
- **Corporate Customization Options**
 - Tailored versions of the course available for organizational training needs.

ISMS Master Class

For Broader and Right
Perspectives

ISO/IEC 27001:2022 Lead Implementer
and Lead Auditor Integrated

This intensive 5-day master class is designed for professionals seeking to become certified ISO/IEC 27001:2022 Lead Implementers and Lead Auditors. The program provides a comprehensive understanding of Information Security Management Systems (ISMS), equipping participants with the skills to design, implement, audit and continually improve ISMS frameworks in line with international standards.

Learning Objectives

- Gain in-depth knowledge of ISO/IEC 27001:2022 requirements.
- Master the implementation methodology for ISMS.
- Develop expertise in planning, conducting and reporting audits.
- Understand risk assessment, controls and compliance strategies.
- Acquire leadership skills to drive ISMS adoption and governance.

Certifications Awarded

- ISO/IEC 27001:2022 Lead Implementer
- ISO/IEC 27001:2022 Lead Auditor
 - Each certification is awarded separately upon successful completion of the respective modules and assessments.

Target Audience

- IT Managers & Security Professionals
- Compliance Officers & Risk Managers
- Consultants & Auditors
- Anyone aspiring to lead ISMS implementation or auditing

Course Accreditation

- This course is accredited by and certification issued by Institute for Governance Research and Certification International (IGRCI), UK

Key Benefits

- Dual certification in just 5 days
- Hands-on workshops & real-world case studies
- Delivered by experienced ISO/IEC 27001 practitioners
- Globally recognized credentials to boost career prospects

GRC Mentor

Master ISMS
Online

Key Differentiators

- Not the traditional LI or LA course, this is much beyond, in its approach and coverage
- An unconventional approach to suit to today's environment
- Covers new threats and vulnerabilities emerged in recent times
- Addressing the emerging threats and vulnerabilities
- Not just focussed on certification
- Not standard / slide reading activity, it is application oriented
- Covers the full lifecycle of security activities
- Examines the relationship between various management systems
- Enablement to prepare required checklists and formats
- Cross industry case studies
- Establish a correlation between and differentiate implementation and auditing
- Post training mentorship support
