Focus on your business

Modern warehousing and logistics is a highly technical and specialised field. Don't make the mistake of thinking "it can't be that complicated, we should do it ourselves". This will take your focus away from running your business and developing new customers.

No software

You don't need to run any specialised software, buy and maintain any hardware. All you need is an internet connection. You can login to your Pik Pak account with a secure username (email) and password. There's no updating or downloading. You just sign in and go.

Scale as you grow

As your business grows, you can add more users, store more inventory, ship more orders. You don't have to worry about renting a bigger warehouse or buying better software. The more you ship the bigger discounts you get.
