

AgriTool

 Reguline AI

AgriTool is a smart, modular SaaS platform developed by Reguline AI that simplifies agricultural subsidy access and regulatory compliance across the EU. Designed for farmers, cooperatives, consultants, and public institutions, AgriTool uses AI to match users with funding, simulate eligibility, and automate paperwork — turning complexity into strategic action.

CHALLENGES

- 10 million EU farms face fragmented subsidies, shifting CAP rules, and bureaucratic overload.
- Navigating eligibility, forms, and deadlines drains time and resources.
- Consultants manage dozens of clients with no unified dashboard or automation.

OUR SOLUTION

AgriTool streamlines the funding and compliance journey:

- **AI Matching Engine** links farm profiles with EU/national/regional subsidies.
- **Scenario Simulator** tests land, crop, and legal variables for eligibility.
- **Smart Autofill** prepares application documents with one-click logic.
- **Multilingual Dashboards** for farms, advisors, and institutions.
- **Regulatory Assistant** summarizes complex laws with direct legal citations.

FOR WHOM

- Consultants & Co-Ops: Manage 100s of farms with centralized dashboards and autofill workflows.
- Farmers: Discover grants, get alerts, and track paperwork from a single app.
- Institutions: Monitor territory-wide funding KPIs and streamline policy access.

CHALLENGES

Plan	Price / Mo	Users	Credits	Key Features
Farmer	€9	1	50	Funding discovery, autofill, alerts
Consultant	€49	1	250	Multi-farm dashboard, KPIs
Team	€199	5	1250	Admin tools, document tracking
Enterprise	Custom	20+	Custom	Dedicated AI, full integration
