

AgriTool

Compliance & Funding Insights for Agriculture

Unlock regulatory clarity & funding opportunities with AI-driven intelligence

Meet the Team

Thomas Wainstein - Co-Founder & CEO

With a background in carbon accounting, logistics, and sustainability, Thomas has led projects in emissions tracking and regulatory compliance. His experience positions him to drive AgriTool's mission of simplifying the access agricultural regulations and funding.

Guillaume Griffith - Co-Founder & CFO

A finance and investment expert, Guillaume specializes in sustainable finance, corporate strategy, and capital markets. His background in impact investing and financial risk management ensures AgriTool's strong financial foundation.

Dr. Anca D. Goron - Chief AI & Data Science Officer

With over fifteen years in Artificial Intelligence research & development, Anca is an innovator and leader in AI-driven compliance solutions. As Head of AI at AVA Research and Government Consultant, she drives AgriTool's data intelligence and automation strategy.

Wilfrid Rimbault - Chief Operating Officer (COO)

ExA seasoned executive with 25+ years in operations and digital transformation, Wilfrid brings expertise in business scaling, market expansion, and process optimization to ensure AgriTool's efficient growth.

Challenges

Agriculture Compliance & Funding Is Complex & Time-Consuming

Navigating agricultural compliance and funding is an ongoing challenge. EU regulations are continuously evolving, making it difficult for businesses to stay up to date. Farmers and agribusinesses struggle to identify available funding opportunities, while compliance teams spend weeks manually researching laws and subsidies. There is no AI-powered solution currently simplifying this process.

Regulatory Complexity

EU laws frequently change, and new sustainability policies require businesses to adapt quickly. Without a centralized source of updated information, companies risk falling out of compliance and facing penalties or missed opportunities for green initiatives.

Time-Consuming Research

Compliance and funding teams spend excessive amounts of time sifting through legal documents, funding requirements, and policy updates. The manual effort required to stay informed leads to inefficiencies and delays in decision-making.

Funding Barriers

Many agribusinesses are unaware of available grants and subsidies due to fragmented information sources. Applying for funding requires extensive paperwork, and eligibility criteria are often difficult to interpret without expert guidance.

Lack of AI Tools

Currently, no AI-powered solution exists to streamline compliance tracking and funding discovery in the agricultural sector. Businesses are left to rely on costly consultants or internal teams to interpret regulations and identify financial support opportunities.

Our Solution

Reguline – Your AI-Powered Regulatory & Funding Assistant

Reguline simplifies compliance and funding discovery by leveraging artificial intelligence. It continuously monitors EU regulations and funding opportunities, providing real-time insights and recommendations, so agribusinesses can stay ahead of compliance and secure financial support efficiently.

Automated Compliance Tracking

Stay informed with real-time updates on changing regulations, ensuring that businesses remain compliant and avoid penalties or operational disruptions.

Funding Discovery Engine

Easily identify grants, subsidies, and financial assistance tailored to your business needs, saving time and maximizing financial support opportunities.

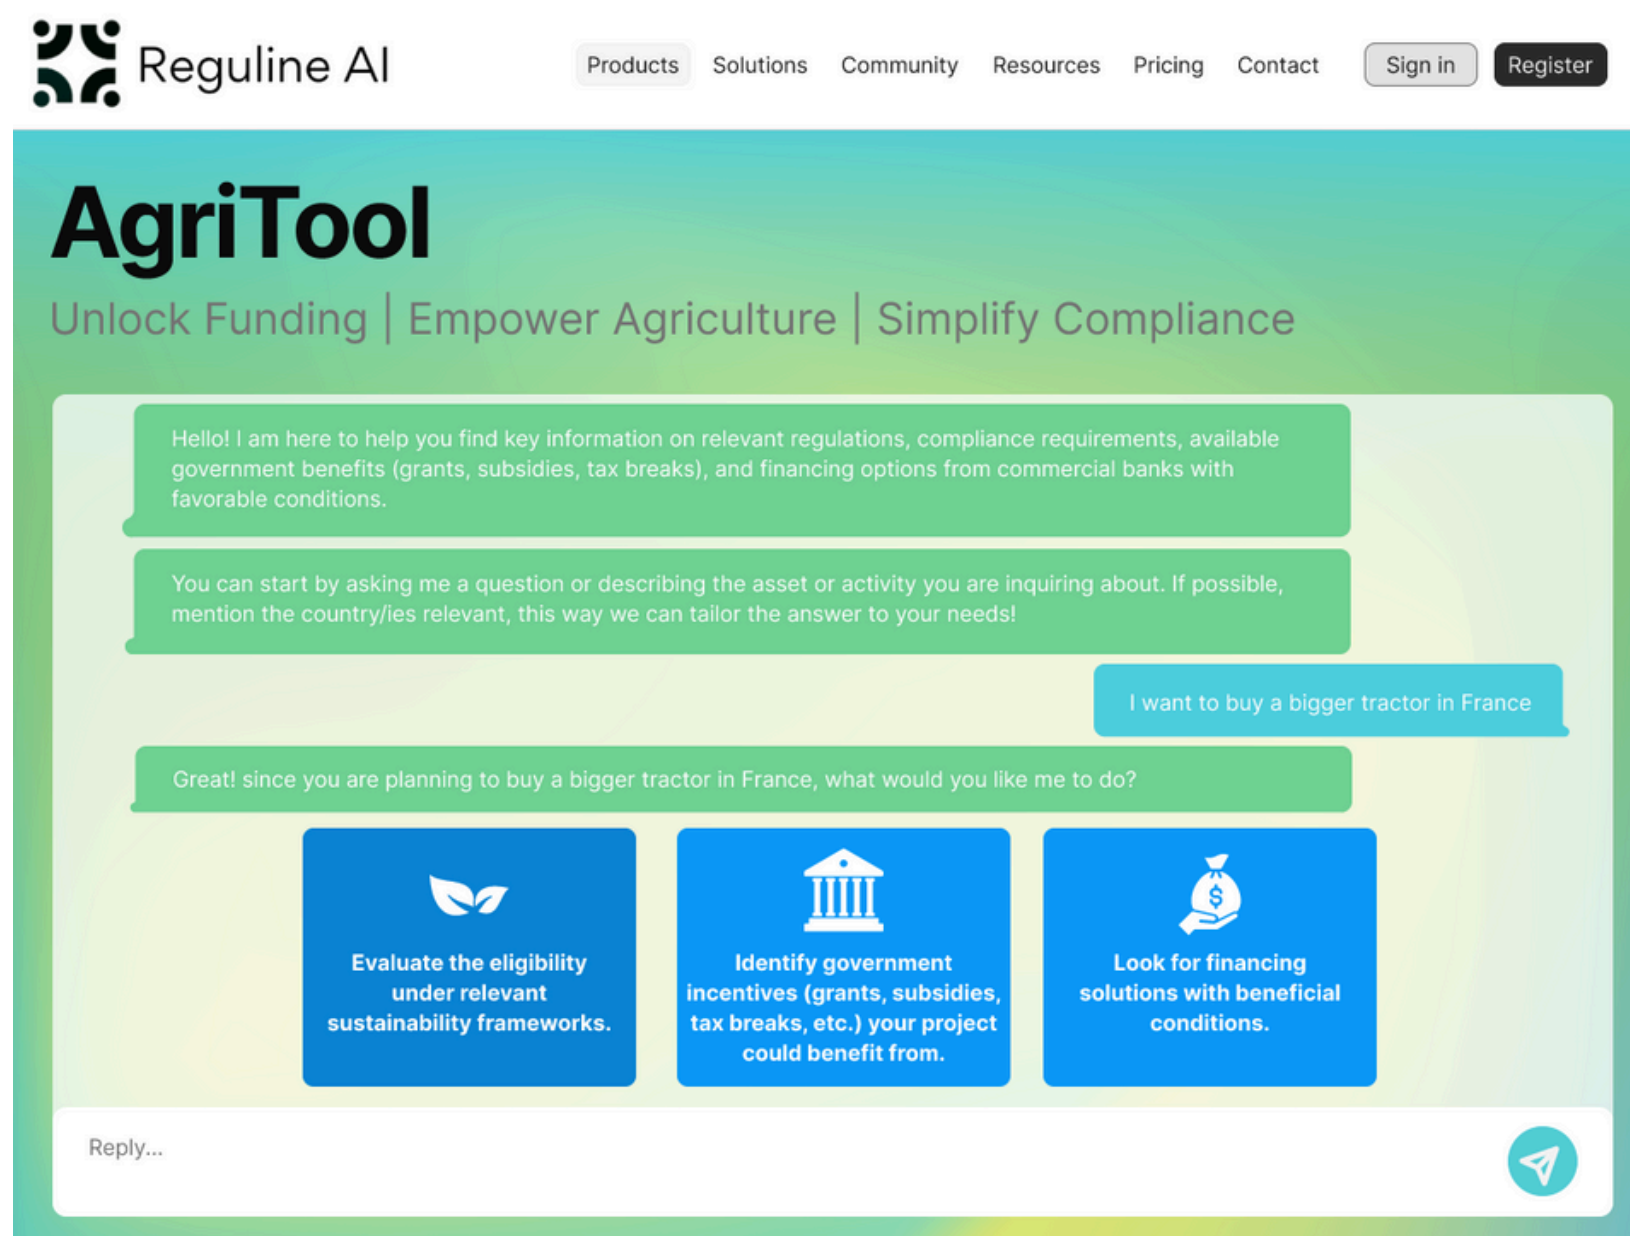

AI-Powered Search

Quickly and efficiently locate relevant laws, policies, and funding options through an intelligent search function that simplifies compliance and financial decision-making.

How It Works

AgriTool is an easy-to-use SaaS platform, accessible online web and mobile, that helps businesses in agriculture quickly find the information they need about regulations and available funding.

AI Scans EU Databases

The AI-powered engine continuously monitors and scans official EU regulatory and funding databases, extracting the most relevant and up-to-date information to match user needs.

Instant Reports & Alerts

Users receive instant AI-generated summaries and alerts that highlight critical compliance changes, upcoming deadlines, and new funding opportunities that align with their business profile.

User Inputs Needs

Users enter their specific compliance or funding requirements, using a customized search to find relevant regulations or financial support programs.

Custom Integrations

Reguline can be accessed as a standalone web platform or integrated into existing enterprise systems via an API, allowing seamless adaptation into compliance workflows and financial planning tools.

KPI Dashboard

Businesses purchasing AgriTool for their clients will have access to a comprehensive dashboard that aggregates user searches. This allows them to monitor trends, identify common queries, and track interest in specific funding or regulatory areas. By analyzing these insights, businesses can better understand market demands, tailor their offerings, and make data-driven decisions to drive growth and maximize revenue opportunities.

Aggregate Search Data

View trends in user searches, including popular queries and topics.

User Engagement Metrics

Track active users, session durations, and frequency of tool usage.

Market Trend Analysis

Identify rising interests in specific regulations or funding programs.

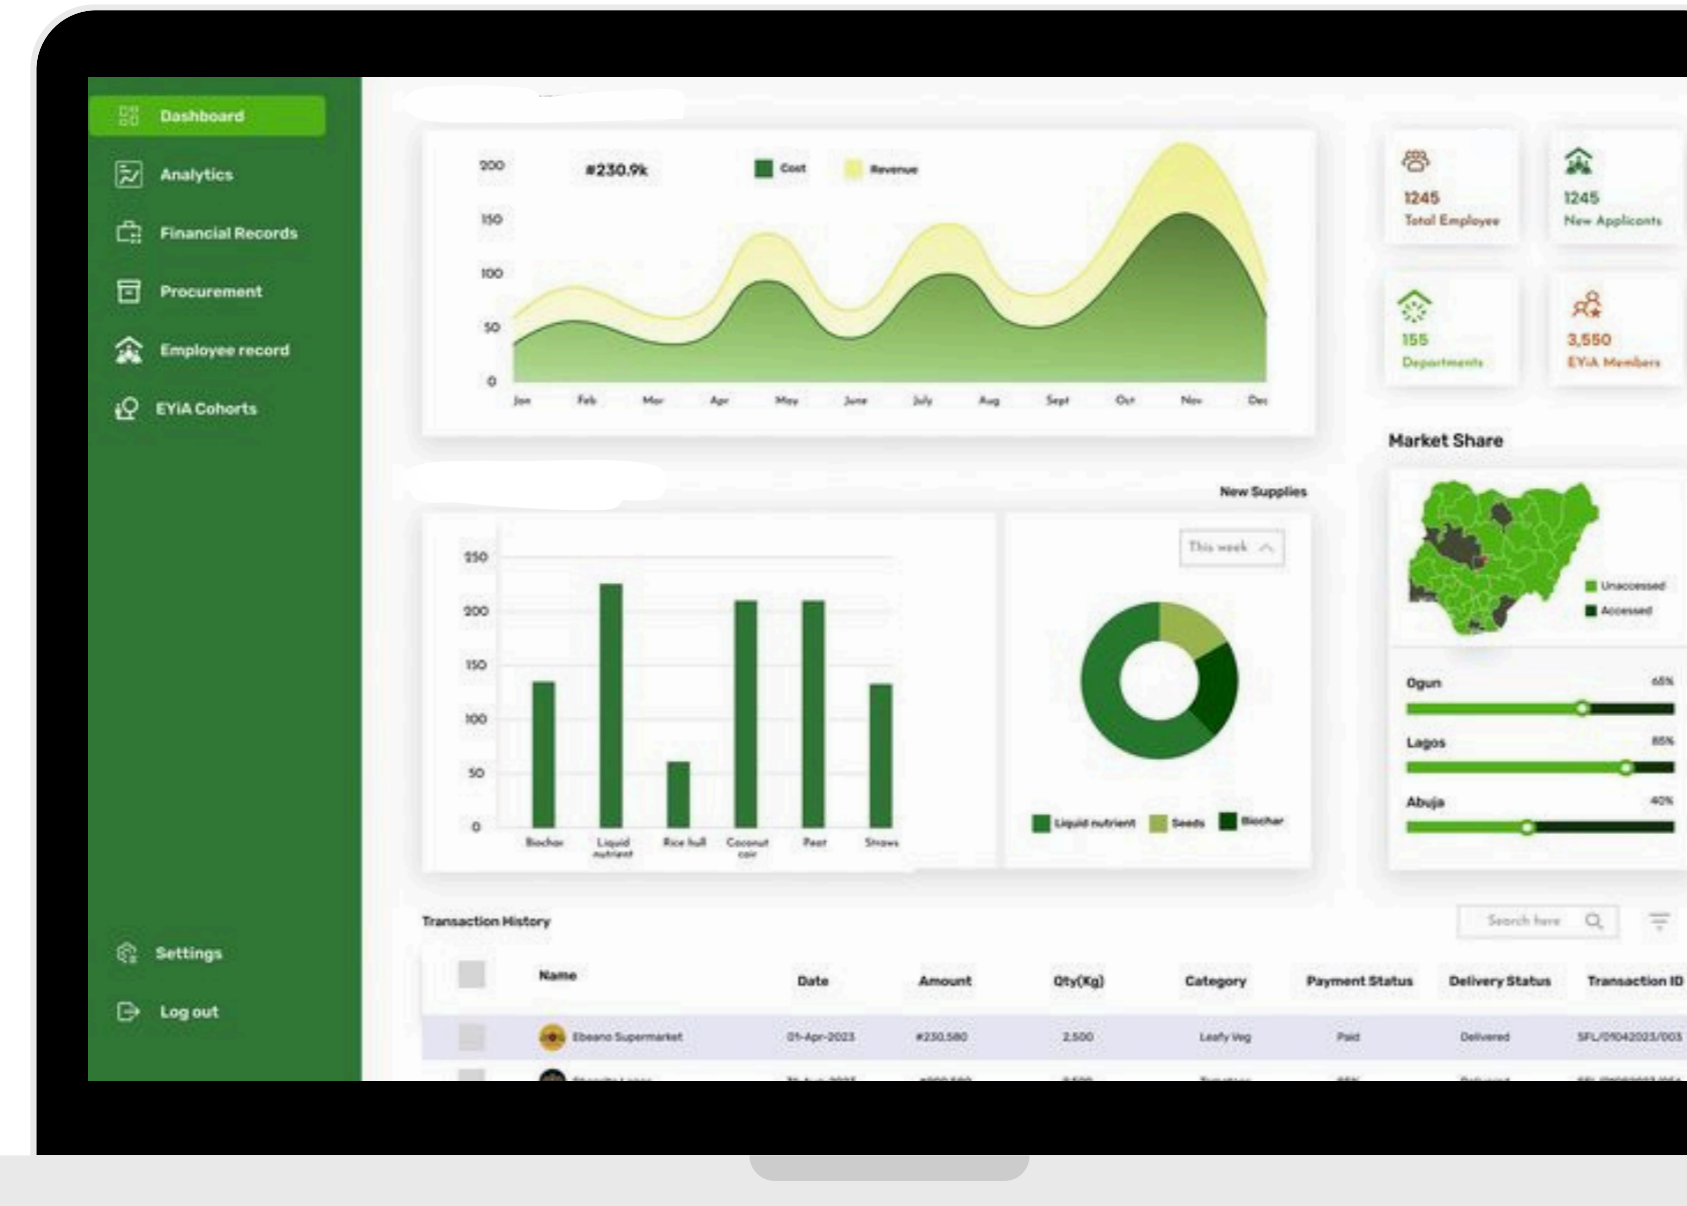

Custom Report Generation

Create tailored reports to evaluate platform usage and performance.

User Activity Tracking

Monitor individual user actions and query history.

User Benefits

Effortless User Experience

AgriTool is designed to be intuitive and easy to use, making it accessible for all users regardless of technical expertise. With a simple interface, real-time AI responses, and organized data, users can efficiently find regulatory information, funding opportunities, and expert insights with minimal effort.

80% Reduction in Time Spent on Compliance Research

Efficiency Boost: AgriTool reduces the time spent on manual research by 80%, allowing users to focus on key business activities and accelerate decision-making.

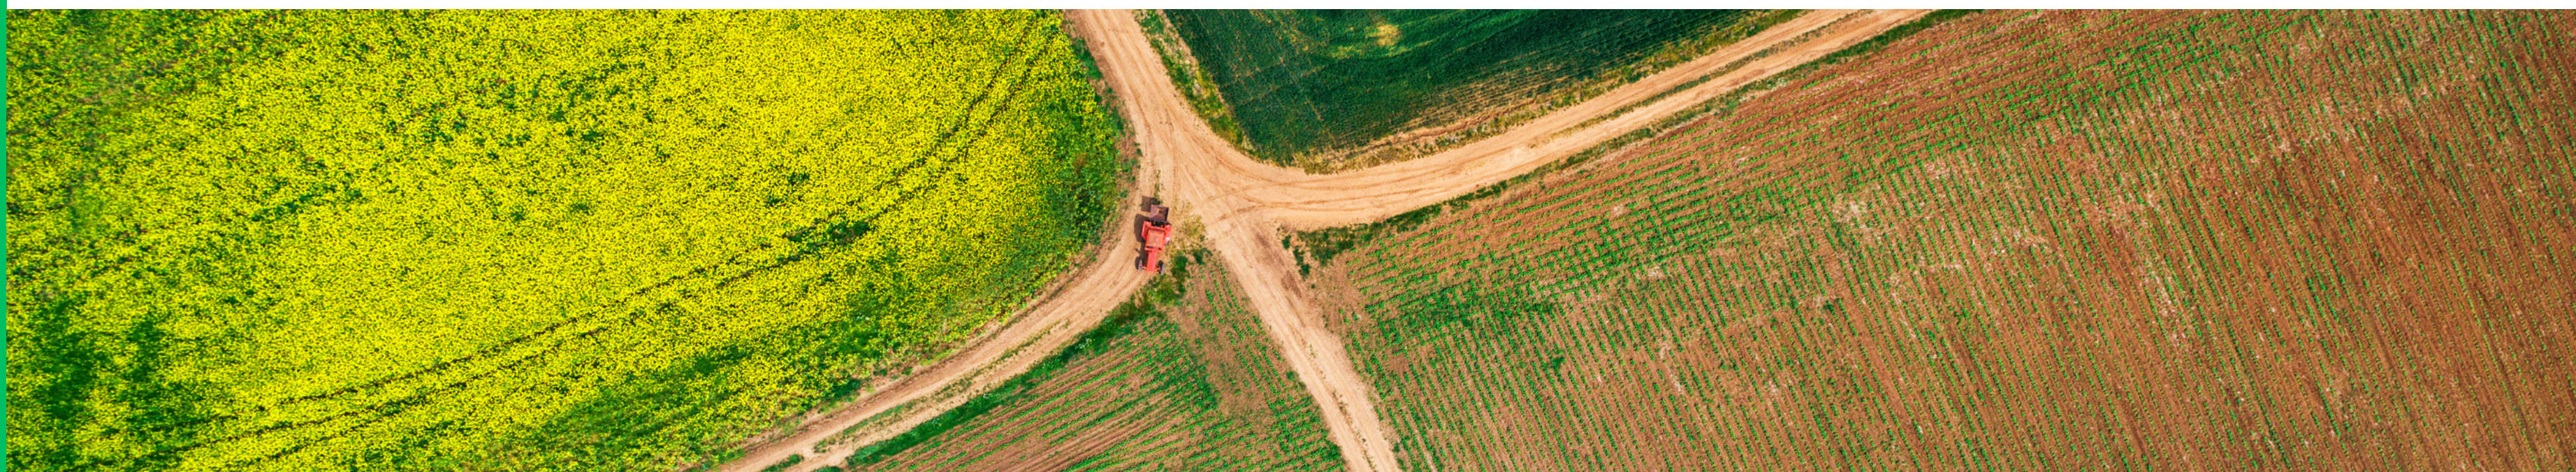

1.2 Billion Data Points Analyzed

Comprehensive Data: AgriTool processes over 1.2 billion data points to provide the most up-to-date and accurate insights, ensuring businesses have the best information for compliance and funding.

300+ Regulatory & Funding Databases Accessed

Broad Coverage: AgriTool connects users to more than 300 regulatory and funding sources, ensuring access to a wide range of relevant opportunities across Europe.

Competitive Advantage

Time Efficiency

Reduces research time by up to 80%, allowing businesses to focus on innovation and compliance rather than manual data search.

Market Trend Monitoring

Offers a dashboard that aggregates user data to identify market trends, enabling businesses to make data-driven decisions and adapt quickly.

Data Access

Connects users to over 300 regulatory and funding databases, ensuring a broad and up-to-date information base.

User-Friendly Interface

Simplifies complex processes with an intuitive and easy-to-navigate platform, accessible to users of all technical levels.

AI-Powered Insights

Provides real-time, accurate AI-driven insights for regulatory compliance and funding opportunities, reducing manual research time.

Expert Access

Connects users to handpicked experts for personalized guidance, making it easier to navigate regulations and funding.

Pricing model

Free

€0

per user/month

- Access to basic compliance and funding insights
