

Home Care Services

About us

Our story

At Executive Healthcare Limited, we recognise that the need for high-quality healthcare services has never been greater in today's fast-paced world. As a result, we provide home care and healthcare staffing services, which play an important part in satisfying this need by offering personalised and qualified personnel to people and businesses in need.

Goals:

Our major objective as a home care and healthcare staffing agency is to provide great support and care to people and businesses. We want to empower you so that you can keep your independence, increase your general well-being, and improve your quality of life. Our primary goal is to be a trusted partner for people, families, and healthcare facilities, ensuring that individuals', families', and healthcare facilities' specific needs are fulfilled with compassion, professionalism, and honesty.

Our Mission

Our mission is to deliver dependable and comprehensive home care and healthcare staffing services that promote maximum health, comfort, and dignity for all of our clients. We want to be the first option for people looking for personalised care and healthcare institutions in need of qualified experts. Through our ongoing dedication to quality, we are committed to establishing long-term partnerships, cultivating trust, and surpassing expectations.

HOME CARE***

Our Services

.....

Live-in care

Our homes carry important memories, and the prospect of leaving may be intimidating, particularly when confronted with limited freedom and the potential of admission to a nursing or residential home.

Executive Healthcare Ltd.'s live-in care service provides a solution by sending a healthcare assistant or support worker to your home and delivering tailored care services to help you maintain your freedom and well-being.

Our staff can meet your specific care requirements, whether you need complicated care or just support with daily duties. Your loved ones may be certain that you are getting expert care from highly qualified healthcare experts in the comfort of your own home with our 24-hour live-in care service.

Holiday care

Although the holiday season is frequently associated with pleasure and celebration, it can also be a painful and lonely time for many. While we meet with our loved ones to exchange presents and enjoy meals, there are innumerable individuals who are lonely and alone, with no one to turn to.

At Executive Healthcare Limited, we realise the value of taking a vacation to recharge, and even if you need frequent care, you shouldn't have to forego a holiday. Our holiday care service gives you the freedom to go wherever you want to go in the UK.

Our holiday care service is intended for individuals who are unable to travel due to their care requirements. As a consequence, they often miss out on much-needed breaks. Our staff can supply you with a health care assistant or support worker to join you on your UK holiday and help you with everyday duties.

Hospital to home care

Being admitted to the hospital may be a difficult experience, and frequently, returning to the comfort of your own home is a major goal during recuperation.

Increased care demands, on the other hand, might make it difficult to transition home and may require placement in a nursing or residential home.

Post-discharge care is essential for ensuring that patients properly recover after being released from the hospital. Many patients have problems and are at risk of readmission if they do not get competent care.

Our Hospital to Home service offers a solution, allowing you to return home following your hospital stay. Our service is intended to simplify your transition back into your home by providing essential support and care throughout your recovery time.

Specialist care

Our specialist care is critical to delivering focused and targeted care to individuals with special medical, psychological, or social requirements. It includes a broad variety of services, each tailored to meet specific needs and concerns.

We take a holistic approach to serving individuals who need specialised knowledge, experience, and resources that go beyond the boundaries of conventional care. We also engage with a diverse team of specialists to offer personalised care and assistance.

Social companionship.....

The sense of security and comfort we experience in our own house is unparalleled. It is a haven where we can unwind and enjoy the things we adore. However, as we age or family members leave, our homes might grow quieter, making it difficult to obtain support when we need it the most.

We realise the value of companionship and support, particularly for seniors who want to live independently, at Executive Health Limited. Our Social Companionship service offers the help of a healthcare assistant or support worker who is adapted to your specific requirements and preferences.

Our service is intended to provide comfort to people who need sporadic support with everyday jobs, domestic chores, or social engagements. We understand that family members may not always be available to visit on a regular basis, and our service may offer them peace of mind in knowing that their loved ones are getting the care they need.

Respite care

In your absence, our Respite Care ensures that your loved one's care and support requirements are addressed. This is less disruptive than placing your loved one in temporary residential care since routines may continue and your loved one can stay in familiar surroundings with their local support system.

Respite carers realise that bringing someone else into your home may be a difficult choice, and they appreciate the need to organise this temporary care around your requirements with the least interruption.

Respite Care may range from a few days to many weeks, depending on your specific requirements. Of course, respite care isn't only for when you need a break; it may also be offered in an emergency if you get sick or need to travel to the hospital on short notice. Respite Care is also useful if you and your loved one wish to experiment with home care for a short period of time to see whether it works for you.

Palliative care

When you have a life-threatening disease, it may be a difficult time for you and your loved ones. Our Palliative Care at Home service seeks to support you through this difficult time by making life more pleasant for everyone concerned.

Our Palliative Care at Home services provide support to individuals who have been diagnosed with a life-threatening disease and want to stay in their own homes. This service is available at all phases of sickness, including diagnosis, treatment, cure, death, and mourning.

The primary goal of our Palliative Care at Home service is to improve your and your family's quality of life. We recognise that your family and friends may be concerned about your situation, and it may be difficult for you to communicate your concerns for fear of offending them.

Night care

We recognise the significance of a good night's sleep for both physical and mental health. Inadequate sleep may have an influence on everyday activities and increase the need for care. Our nightcare service is intended to provide essential assistance and care throughout the night, resulting in a restful night's sleep and enhanced daytime functioning.

Poor sleep, according to research, may cause shakiness, disorientation, and isolation throughout the day, affecting one's ability to communicate with loved ones and participate in social activities.

Our nightcare team is made up of highly competent healthcare professionals who have been trained to offer personalised care to match the requirements of each client. Our night care service is personalised to give essential support, whether it be medication assistance, personal care, or just being there for company and reassurance.

Our Care Process

1. Get in touch with our helpful customer care representatives.

If you feel that in-home care is the best option for you, please contact our helpful team as soon as possible. You may also email us to schedule a free, no-obligation examination at your home.

2. Consult a professional.

Our care team will visit your home to discuss your care needs and the type of carer you choose.

3. Creation of a care plan

Using the data gathered during your assessment A personalised care plan will be created.

4. Choose the Best Carer

We will choose a group of carers that we feel will best match your needs. We will then send you an email with a profile of each carer, and you will be able to choose whether or not to hire them.

5. The process of care begins.

Your carer will begin to care for and assist you.
