FOCUS ON FUSION

The Complete Manufacturing Platform
for Independent Contact Lens Labs

Seamless Migration

We will take your existing designs—no matter how complex—and add them to Fusion so you can immediately manufacture your full portfolio.

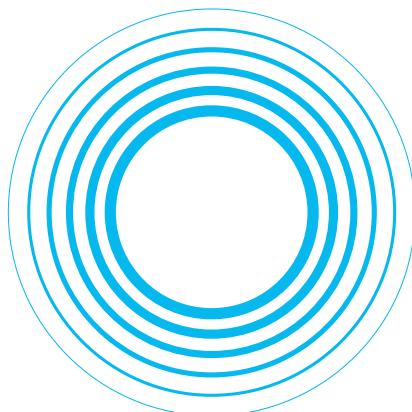

Equipment Integration

Fusion connects directly with Optoform, DAC, and REM lathes.

Streamlined Order Management

Fusion simplifies workflow with integrated order management:

- Price list configuration
- Invoicing and delivery documentation
- Full traceability across client practices

LENS ANALYTICS

FOCUS ON FUSION

Expand Your Portfolio with Confidence

The global custom lens market is built on three pillars:

- Scleral contact lenses
- Ortho-K corneal RGPs
- Custom soft designs

Fusion gives you access to all three—without ongoing fees:

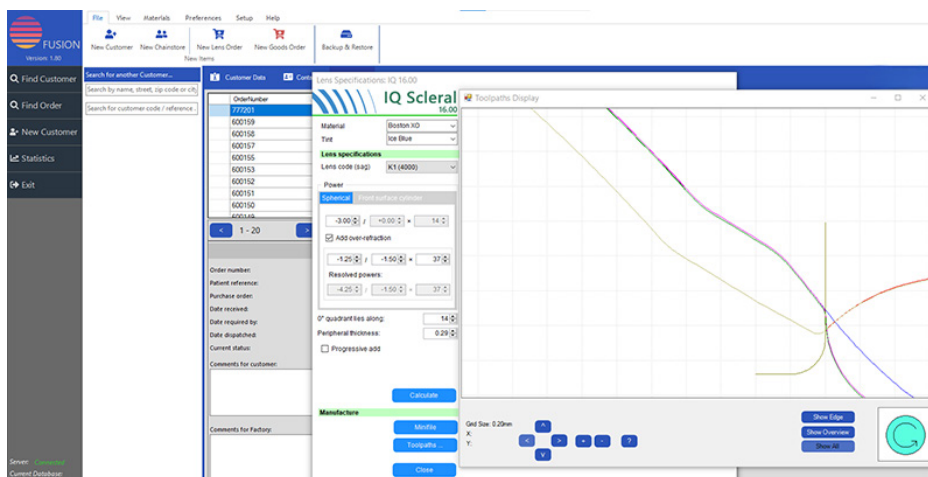

- Clinically proven, ready-to-use designs
- One-time payment for a lifetime licence
- Full documentation and expert onboarding

IQ Scleral

A precision scleral lens clinically developed for quadrant-specific control, available in 15.50, 16.00, 16.50, 17.50, and 18.20 mm diameters.

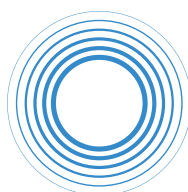

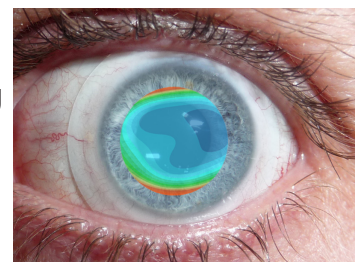

Features:

- Spherocylindrical and high-definition optics
- Centration-enhancing prismatic zones
- Multifocal options for presbyopia
- Custom localized vaults for topographical irregularities such as pinguecula
- Includes full fitting guide and trial set specifications

High Order Aberration (HOA) Personalisation

Fusion enables front-surface customization using higher-order aberration maps from a well-fitted diagnostic scleral lens.

ASPIRE Overnight Ortho-K

Overnight Myopia Correction and Control

ASPIRE is a clinically refined overnight orthokeratology lens designed to correct up to -6.00 D of myopia and 1.50 D of astigmatism.

It reshapes the cornea gently during sleep—eliminating the need for daytime vision correction and helping to slow axial elongation in young, progressing myopes.

Key benefits:

- Predictable overnight vision correction
- Myopia management for children and teens
- Designed for comfort, centration, and consistent results
- Backed by detailed fitting guidance and clinical validation

Available with Fusion via lifetime licence or monthly pay-per-use—your choice.

Add Specialist Soft Lenses —Your Way

Fusion makes it easy to expand into advanced soft lens designs—offered as modular bolt-ons tailored to your needs.

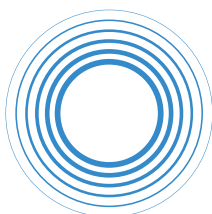

Choose how you grow:

- Lifetime licence for full ownership
- Pay-per-lens option for flexibility
- Manufacture in your preferred soft lens material

Fusion's custom soft lens portfolio includes:

- Soft lenses for keratoconus and irregular corneas
- High-definition optics for enhanced visual performance
- Prismatic and dynamically stabilized toric designs
- Multifocal and toric multifocal solutions
- ASPIRE Myopia Control soft lenses

Build your offering with clinically proven designs and full support—ready to manufacture in your own lab.
