**REMEMBER: TI's are NOT self-defined. The FISA Court defined us as TARGETS.**  
There are no conspiracy theories, there are only truth and lies.-Skizit Powers

## HOW TO PARTICIPATE IN REPEALING FISA 702

Targeted Humans plans to send out a letter and a package of what is being done to Targeted Individuals. The letter will be published on the website under TI news. Can you imagine a person knowing the FISA Court is approving Targeting Individuals/Kill List and renewing FISA 702? **We need to know they have the information they need to make an informed decision.**

Each TI has an interest in this. It will most likely be renewed. However, TI's can put their opinions and facts before the committee discussions, probably around the 13th. It is set to expire on the 20th. We need to make sure our packages are received by the committee before that date. We need donations for posting. Each package costs \$3.00 to send and so far we have 35 recipients.

We need your story to go with the package. You do not have to put your name on it, however, it need facts, pictures, CT-scans, X-rays, etc. We need to be in the discussion.

We need each of you to contact your representatives in your state for the House and Senate and provide them with electronic information or paper documentation of what is happening through the FISA Court.

**PLEASE DO YOUR SHARE! Either donate money or stories, proof, or your name/opinion as a TI. Share this newsletter!**

If you like the illustration, you may order it soon on the website on a T-shirt!  
It was designed by artist Skizit Powers.

## **133 AI, Civil Rights, Labor & Privacy Groups Urge Congress to Oppose FISA Reauthorization; Stop Mann AI Surveillance**

### ***Before Reauthorizing Government Spying Powers, Congress Must Close Data Broker Loophole***

March 19, 2026

**Washington, D.C.** — On Thursday, a coalition of more than 130 leading AI, civil rights, tech and progressive organizations convened by Demand Progress and the Project On Government Oversight [sent a letter](#) opposing Speaker Johnson's just-announced plans to ram controversial surveillance legislation through the House next week. The 133 signers include: AFT, Color of Change, Future of Life Institute, Indivisible, Lawyers' Committee for Civil Rights Under Law, MoveOn, Stop AAPI Hate and UnidosUS.

## **CAMPAIGN EDUCATE INFRAGARD PARTNERS**

See Targeted Humans sample letter to one InfraGard partner (restaurant) to educate them on what InfraGard really is and request they ban all stalking and weaponized communication infrastructure in their businesses. This will be posted on various platforms. You may copy it edit it and present it to InfraGard partners in your area.

Another letter will be a general letter to InfraGard partners to let them know what they are really involved in. Some may not know. The restaurants and grocery

stores in Florida are definitely involved in using their managers and employees as stalkers inside and outside their stores.

See <https://targetedhumans.org/letter-to-infragard-partners>

## Medical Implantation or use of Targeted Individuals for Experimentation or Clinical Trials

**Does the Cures Act give anyone the right to implant you without any kind of permissions?**

No, the [21st Century Cures Act](#) does not authorize anyone to implant you with any device. It is a federal law focused on accelerating medical product development, improving digital health record interoperability, and ensuring patients have free, immediate access to their electronic health information (EHI), such as lab results and clinical notes

**Is there any legislation either federal or state that authorized implantation without consent or use of civilians for medical trial without their consent?**

No, there is no legislation—federal or state—that authorizes the implantation of devices or the use of civilians for medical trials without their informed consent in the United States. In fact, such actions are prohibited by multiple laws and ethical standards. Here are some key regulations and laws that protect individuals' rights in these contexts [**Exceptions are made for all Targeted Individuals**]:

## GREETINGS FROM GERMANY

Our association, Schutzschild e.V., is trying, like you, to motivate people to do more. I always tell everyone that this won't stop on its own, we must stand up and fight. But some people are tired, they can't go on. They've distributed so many flyers, written to so many organizations – I can understand them.

We don't have InfraGrad. Those who are defaming us are from the secret service. Everything you're telling me is the same here in Germany. We wrote to the UN, we didn't know they were part of it. Now I know how important it is to exchange information with other countries. Here is the website of our association in English. Maybe you can add it to your Newsletter. R. in Germany

### TI EXPERIENCE:

TI had not been out of the house all week and had no implants active. Unbelievably, it is possible to get them quieted down with various methods.

TI got in the car and drove to CVS. The windshield gets covered with stuff that falls out

A decorative border of yellow daisy flowers surrounds the central text area.

of the oak trees overnight in the spring. It was just cleaned the day before. There was a man that walked across the driveway and was prominently in the field of view of the TI. This has never happened before. The TI thought "its probably a stalker." He at first looked like a vagrant because of the knapsack. We don't have a lot of homeless here but there are some in this area because of the stores being all together and there are some wooded areas left. He walked along the fence to TI's right where he can be seen clearly because the window was down. He looks to have clean clothes on and he has a large cell phone (4th picture). It was displayed so that it could be seen by TI. That's what the TI was looking for. That is what connects the implants. TI was interested in where he went afterwards.

While sitting waiting for prescriptions, the stalker appeared in the rearview mirror crossing behind the car to the left which means he's clearly heading to the store's front door. Why wouldn't he have gone around the shorter other way to the store front?

When TI got done with getting prescriptions, TI drove around the store to the front of the store looking for where the man had gone. That's when the second sequence of pictures were taken. At first it looked like he was peeing against the wall because of the way he was standing. As the TI drove a little further, you could see he had his phone plugged into the wall and his feet were on either side of the knapsack. So was that why he came to CVS, to charge his phone? Was he not a stalker? The phone had to have been working because the TI's feet implants came on immediately when she saw him in the first pictures. So yes, probably. The TI's feet have never come on before while waiting for prescriptions. There is sometimes a question as to whether a person is a stalker or not. Most of the facts here say, Yes, in this instance, unless a person's phone can be used without their knowledge. Plausible deniability is present.

**VIDEO:** <https://youtu.be/pR1Np2jzxSg>

Thank you and welcome to [TargetedHumans.org](https://www.TargetedHumans.org). Our PayPal is our email: TargetedHumans@proton.me. We invite all TI's to join our organization. We now have a **DONATE button** on our website. We also have a **MEMBERSHIP** and a TI Booklet in our store. Please contribute in some way to our END the FISA ACT Campaign. Next we will have shielding products and T-shirts.

There is no room in the TI community for competition. In communities who have shared experiences and need to collaborate, competition breaks the implicit trust that holds the culture together. It turns teammates into, at best, rivals, and at worst, enemies, destroying the "all in this together" mentality that drives research or non-profit organizations. It alienates people, just like the world we are fighting.

Please encourage others in the TI community to organize for shared benefits. Everyone has something to contribute, with or without titles and letters after your names. Our newsletters are downloadable online at <https://targetedhumans.org/newsletters>.
