Targeted Humans Conference Call

Sunday 8:00 p.m. EST

7:00 p.m. CT, 6:00 p.m. MT, 5:00 p.m. PT, 4:00 p.m. AKT, and 3:00 p.m. HST

FreeConferenceCalling: 1-971-224-6579

Access Code: 910804

TI Experience: Study Your Stalking Scientifically!

Observation followed immediately by questioning, forming a [hypothesis](#), conducting [experiments](#), and [analyzing results](#) to draw conclusions

This week we have a team demonstration. Within 4 minutes of entering the store, a young woman and an employee dressed in all black ("MIB") appeared. The woman was pretending to be on a phone call with the phone to her head. She was facing away from the Targeted Individual ("TI") pretending to shop to begin with. The MIB comes walking towards us and they give each other a conspiratorial glance which implied a shared secrecy and mutual understanding.

Then a second later the MIB gave a glance at the TI. Then he walked on and appears later to the right of the TI. The woman turned around and walked straight at TI. She' carrying a small basket for non-serious shoppers. People are sent in with a mission and sometimes that means paying for a meal or buying groceries (pretending they are legitimate). After years of this, a TI can spot their stalkers easily. There is something that gives them away. Either they are just wandering around the store or they are not seriously shopping. Sometimes they act overly intent on examining products, bending over and looking serious, touching a

product on the shelf and then walking on and never buying anything. There is something exaggerated about their intensity that gives them away. Sometimes they turn on a radio real loud suddenly right beside you. Sometimes they rudely reach over you to reach something on the other side of you. Sometimes they hit your basket and make you fall over. They hit this TI in the head with a basket one time when she reached down to tie her shoe at another Publix. Sometimes they hunt you from isle to isle. The grocery store is a battle ground and the stores are [InfraGard](#) partners. They have electronics in their infrastructure to strike TI's.

Then the woman is seen coming straight for the TI again while the TI is picking out avocados. The woman remains aloof. This is how stalkers separate TI's from society. They act like they are the only ones alive and the TI doesn't exist. This is the psychological portion of stalking. The woman goes around the TI's back and the worker in the vegetable section. The MIB is behind the TI.

Then the woman comes straight at TI again. This makes 3 times within 5 minutes. Then she turns down the aisle in front of TI and walks away.

It didn't look like they did anything, right? That's the plausible deniability built into all stalker activities. "They were just....." The TI knows when their implants start either immediately or build up into undeniable pain.

Locating someone or an object using two transmitters (or more accurately, receiving signals at two different locations) is generally called Direction Finding (DF), specifically utilizing techniques like triangulation or time difference of arrival. When using multiple receivers to determine position, it is also referred to as [radio frequency \(RF\) trilateration](#) or [triangulation](#). This can be done with smart phones communicating with the store's infrastructure. See <https://targetedhumans.org/wban-data>

The stalkers GPS their victim and then the victim is struck with microwave signals that connect with the TI's implants. This store stimulates the implants in the TI's feet, so she rides in an electric cart so they can't make her fall over again. They strike her in the tops of her arms, the hips and knees. It is not known whether the employees consider this part of their job description or if they get paid extra. Not all employees at Publix know this is going on, its usually the older ones over 18. **VIDEO:** <https://youtu.be/4FBKZ6OdmlA>

Can drones make a direct link between the drone and a WBAN?

Yes, drones (Unmanned Aerial Vehicles or UAVs) can indeed create a **direct wireless link** to a person's **Wireless Body Area Network (WBAN)**, typically acting as a **flying gateway** or "sink node". UAVs) can be used to support, monitor, and interact with a person's Wireless Body Area Network (WBAN) on the ground. Research is actively exploring the use of drones as mobile, elevated "coordinator nodes" or relays to improve communication reliability, provide emergency support, and manage data from wearable or implanted sensors. Here is how drones can operate a person's WBAN:

- As Mobile Data Hubs (BAN Coordinator): In a WBAN, sensors on the body usually send data to a central device (like a smartphone). A drone can take over this role, serving as an advanced, mobile personal server that gathers

data—such as heart rate, temperature, and motion—and transmits it to a medical server.

- **Enhanced Connectivity & Coverage:** Drones can act as aerial relay nodes, overcoming issues like "body shadowing" (where the human body blocks signals from reaching a ground-based station). This ensures reliable data transfer in remote areas or disaster scenarios.
- **Emergency Response & Monitoring:** A drone can be dispatched to monitor a patient's vitals in real-time if a potential health issue is detected. If a person falls or has a medical emergency, a drone can receive the WBAN alert, verify it, and potentially deliver first aid (like an automated external defibrillator).
- **Energy Efficiency:** By acting as a closer, more efficient receiver, drones can reduce the power consumption of wearable sensors, extending their battery life.
- **Direct Interaction:** In some scenarios, a drone can interact directly with the user based on data from their wearable sensors, such as sending alerts via sound or displaying information on a screen to the user.

How Drones Link Directly to WBANs

- **Flying Base Station:** A drone equipped with a low-power medical radio can hover over a patient (e.g., in a disaster zone or remote quarantine) and act as the central hub for their body sensors.
- **Data Collection:** The drone "sniffs" the data from WBAN sensors (IEEE 802.15.6) as it flies within range, collecting vital signs and transmitting them via a long-range cellular or satellite backhaul to a hospital.
- **RF Energy Harvesting:** Advanced research prototypes use drones to wirelessly power battery-free WBAN sensors by beaming radio frequency (RF) energy down to the patient, who then uses that energy to transmit data back to the drone.

Technical Protocols

- **Standard Compatibility:** To talk directly to a drone, the WBAN usually uses the IEEE 802.15.6 or Zigbee standards, which the drone's onboard computer is programmed to recognize.
- **Secure Authentication:** High-security protocols allow the drone and the WBAN to perform "mutual authentication" in mid-air, ensuring the health data is only shared with authorized medical aircraft.
- **Hovering altitude design, power control and time allocation**

Donald Trump and Epstein Get the Carnival Treatment in Germany and Its Brutal by Lee Moran

Tue, February 17, 2026 at 5:11 AM EST

<https://www.yahoo.com/news/articles/donald-trump-epstein-carnival-treatment-101105765.html>

Donald Trump was once again the target of satirical mockery at the annual Rose Monday carnival parade in Düsseldorf, Germany.

One effigy of the president, with "ICE" representing Immigration and Customs Enforcement written on his sleeve, depicted him punching Jesus Christ in the face with "Love & humanity" on his shirt.

THE DISPOSITION MATRIX

The **Disposition Matrix**, informally known as a **kill list**, is a database of information for tracking, capturing, **rendering**, or **killing** suspected enemies of the United States.^[1] Developed by the **Obama administration** beginning in 2010, it goes beyond existing kill lists and is intended to become a permanent fixture of U.S. policy.^[1] The process determining the criteria for killing is not public and was heavily shaped by national counterterrorism director and former **Central Intelligence Agency** (CIA) director **John O. Brennan**.^[2]

Though **White House**, **National Counterterrorism Center** (NCTC), and CIA spokespeople have declined to comment on the database, officials have stated privately that kill lists will expand "for at least another decade", if not indefinitely. One official stated "it's a necessary part of what we do".^[1] **Paul R. Pillar**, the former deputy director of the CIA's counterterrorism center, has stated, "We are looking at something that is potentially indefinite".^[1] The database's existence was revealed in a three-part series published by **The Washington Post**.

ACLU Comment on Targeted Killing "Disposition Matrix"

<https://www.aclu.org/press-releases/aclu-comment-targeted-killing-disposition-matrix>

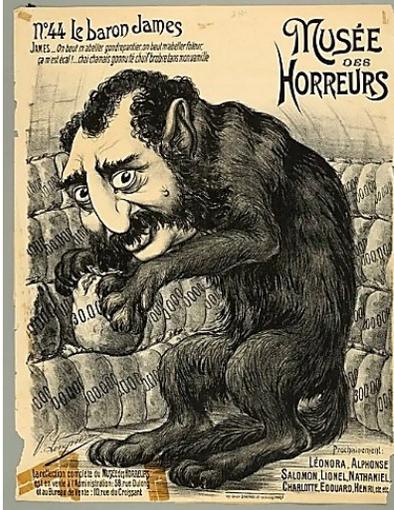

Below is one of the most important videos ever made: "It all began with 9-11..."

If you live in Florida and want to be part of a law suit regarding targeting please sign up at the TargetedIndividualRegistry@proton.me. We are actively searching for a law firm to take on implanting, stalking etc. This is going to take more than one attorney. Its may take several firms. Please fill in the TI experience questionnaire on the first page of our website and send it to our registry email. You can use the Word version or the hard version and send to our P.O. Box 2265, NSB, FL 32170-2265.

You will be given a phone number to call. **WE WILL GET A LAWYER AND WE WILL MAKE THIS CRIMINAL PROGRAM PUBLIC. IT WILL HAPPEN.** We deserve to be heard! **We deserve to live free!**

If you would like to be part of our campaign against InfraGard, please write an email to TargetedHumansAmerica@proton.me. The work would require a computer, looking up business names, addresses and CEO's/owners. A package informing businesses of what InfraGard really is - preparation for a Socialist-Marxist-Nazi system where the government already has their foot in the door, ready to privatize all businesses. WEF has said in 2030, "You will own nothing and be happy." [InfraGard](#) has a controlling foot in the door, developing collaborators who they lie to about what Targeted Individuals really are. Their

propaganda is exactly the way [Hitler convinced people that the Jews were bad](#) by dehumanizing them, describing them as vermin like cockroaches or rats that needed to be exterminated. Jews were denied moral consideration* which facilitated the systematic atrocities carried out against the Jewish population. InfraGard tells people that Targeted Individuals are rapists, pedophiles and criminals who need to be surveilled, implanted, tortured and killed. If they were criminals, they would be prosecuted. They are under double jeopardy, at risk for being

punished twice for the same crime, except there is no crime. Lets inform InfraGard partners who the real criminals are with the truth! **Please help!!!**

*To deny a person moral consideration—also referred to as denying them moral standing or moral status—means to act as though that person's interests, pain, or well-being do not matter morally, or that they do not deserve to be treated with respect. It is the exclusion of an individual from the "in-group" of people who deserve ethical regard, often treating them instead as a means to an end, an object, or a lesser being.

Anti-Drone Weapons are Microwave Weapons

<https://www.army-technology.com/news/raytheon-coyote-block-3nk-demonstration/?cf-view>

VIDEO at left. Click on picture.

According to RTX, operators can recall and redeploy the system for repeated use. Raytheon manufactures both kinetic (Block 2) and non-kinetic variants of the Coyote, which are designed to address small to large drone threats

over extended ranges and at higher altitudes compared to other effectors in its class. The Coyote family is integrated with Raytheon's Ku-band Radio Frequency Sensor (KuRFS), which provides detection and engagement capabilities against various unmanned aerial platforms, from single units to swarms.

SHIELDING TIPS:

Camera Sunglasses 1080P HD Video Recording with 32GB Storage Hands-Free Photography

Crisp Recording: Capture clear 1080p video, ideal for documenting outdoor adventures and daily activities.
Ample Storage: Features 32GB of built-in storage, allowing up to 7 hours of continuous video recording.
Durable Water-Resistant: Designed to withstand light rain, sweat, and splashes, suitable for various outdoor activities.
Continuous Power: Supports charging while recording,

enabling uninterrupted filming during extended sessions.

Versatile Lenses: Easily swappable lenses offer choice in colors and functionalities, including prescription lens compatibility. \$28 at Walmart online. One button turn on/off.

Is your shielding not working?

Would you like a few hints that will make it work 100% better?

If you have a silver shirt, pants, jacket or even a blanket, the trick is to not let it touch your skin. In 1836, Michael Faraday constructed a 12-foot square wooden room, covered it in metal foil, and placed it on insulated supports to prove that an electric charge resides only on a conductor's exterior. He connected the cage to a powerful electrostatic generator and, while standing inside, found that even sensitive electrometers showed no electrical charge present inside the room. He stood inside with an electroscope and found no charge, despite high-voltage sparks striking the outside. This confirmed that **charges on a conductor redistribute to the outside and cancel out on the inside**, protecting the contents. It does no good to wear a silver shirt on your skin. You must wear a garment between you and the silver material. There should be a neutral gap.

YOU SHOULD NEVER NEVER NEVER PUT TENS UNIT PADS ON YOUR EYE LIDS. A LADY DID THAT AND WENT BLIND. DAMAGE WAS IRREVERSIBLE.

Have you experienced numbing of the hands and feet? [Nitrile gloves](#) as thick as you can find (.8 mil). If one doesn't stop the pain and numbing, put another one on until it stops, 2 usually works on hands and feet. Get the XL ones for your feet. Put the big toe in the pointer glove finger

Is some part of your body vibrating? Vibration leads to heating and heating destroys your cells. Put a different regular rhythmic vibration into your body to help stop the pain. They work well on the soles of the feet, be careful with the strength, Practice first so you know what feels good to you
[TENS 7000 Digital TENS Unit](#)

Do they heat you while you sleep or while sitting? This is the longest lasting cold pack on the market. It is always flexible and comes with a strap to hold it on you if you put it on your back. There are 4 sizes.
[CryoMAX Cold Pack, Latex Free, 8 Hour Cold Therapy](#)

Shielding for the legs and feet

There are copper leggings which can keep your legs and feet covered so this doesn't happen. There is no reason for anyone to go without shielding when TI's are so generous.

If you know of anyone who is having this problem, please help us get in touch with them so if they cannot afford shielding, it will be provided by Targeted Humans.

Shielding will be available for purchase in our store hopefully next week.-Skizit

Thank you and welcome to TargetedHumans.org. We invite all TI's to join our organization. There is no room in the TI community for competition. In communities who have shared experiences and need to collaborate, competition breaks the implicit trust that holds the culture together. It turns teammates into, at best, rivals, and at worst, enemies, destroying the "all in this together" mentality that drives, for example, research or non-profit organizations. Please encourage others in the TI community to organize for shared benefits. Everyone has something to contribute. Our newsletters are downloadable online at <https://targetedhumans.org/newsletters>. Store and shielding are coming soon.
