Targeted Humans Conference Call
Saturday 8:00 p.m. EST

7:00 p.m. CT, 6:00 p.m. MT, 5:00 p.m. PT, 4:00 p.m. AKT, and 3:00 p.m. HST

Free Conference Call: 1-971-224-6579
Access Code: 910804

TI Experience: What's his focus? Phone, TI, Phone, TI

TI completed shopping at Publix and was focused on checking out. This has happened so many times, its like routine. They take the opportunity of when the TI is concentrated on payment, getting out the credit card, using the machine to check out, and bagging, to get up close to the TI in an electric cart. This man had his phone to the back of the head of the TI for several minutes without their knowledge due to being engaged in the business at hand, then when the checkout procedure was done and the TI then focuses on what's around them again, they noticed the phoner. He thinks he's being convincing that he's not doing anything, but you can tell what he's really doing by just observing his focus:

-- (1) his phone which communicates with repeater antennas in the store which communicate with the TI's implants alternating with (2) checking the TI position.

Note the look away to begin this sequence: The phoner is checking out his accomplices which include the store managers who operate this program in their store as [InfraGard partners](#). This is a coordinated attack. There were other phoners in the store (they had their pictures taken also) and they were all operating via a controller or "handler" which can be the store manager or an outside handler on location from a government agency or COPS/local police.

This is a different kind of stalking than the ordinary one-on-one kind of stalking. This is planned, organized multiple stalker secret operations . The ordinary person has no idea what is going on right in front of them. No one actually feels the pain except the victim of this torture. The totality of the program is so immense you would have a hard time explaining your pain and the enormity of the attack to a person who knows nothing or who pretends to know nothing (police officers). The result is you just take the pain and move on, except eventually, you will be recognized as a Target when all this is uncovered. Documentation of these crimes is justifiable and urgently necessary.

While shopping, the TI was struck in the feet with microwave energy operating illegally surgically placed implants, then again several times deep in the left hip. A grocery store and multiple people have the operating frequency of your illegal implants. These things are painful and are not normal for the ordinary shopper, it is performed only for illegally implanted TI's. How would a complete stranger and a grocery store know the exact frequencies to operate a customer's implants? InfraGard. The socialist foot is in the door of businesses all over this country, subtly lying about their motives for full control of everyone, businesses and churches included. Who operates InfraGard? <https://targetedhumans.org/infragard>

The WBAN is being used for torture, not healthcare. This particular Publix was rebuilt with the infrastructure electronics, transponders, transmitters, repeaters, occupant location system and antennas for connecting with implants and operating them. This is what the "[Build Back Better](#)" campaign is all about -- destruction of existing infrastructure and building back according to Agenda 21, 30, 50, and the New World Order control with surveillance architecture. This is a crime and at some point, Publix will be outed as to what they are doing and what they are collaborating with - Infragard Stalking, Torture, Psychological torture and Assassination. If you have any question as to whether this group assassinates people, [please see our obituary page](#). These TI's were forewarned about their death - formally called a "suicide" (shot to death in bed or hung in a closet). They were assassinated. - TI, New Smyrna Beach, FL February 2026

Photography in public is permitted by law as long as there is no expectation of privacy. No photographs are being used for commercial purposes.

What is the Wireless Body Area Network?

The **wireless body area network (WBAN)**, a **body sensor network (BSN)** or a **medical body area network (MBAN)** that **Targeted Individuals are concerned about** is a wireless network of implanted computing devices embedded inside the body as implants which are placed in our bodies covertly without our knowledge or consent and are used to track and surveil us. Instead of serving the purpose of

healthcare, the implants are used as torture devices to heat, vibrate, and destroy our bodies.

These networks include multiple small body sensor units (BSUs) and a single central unit (BCU). Cell phones are used as data hubs or gateways and provide a user interface for viewing and managing BAN applications. The development of WBAN technology started around 1995 around the idea of using [wireless personal area network](#) (WPAN) technologies to implement communications on, near, and around the human body.

About six years later, the term "BAN" came to refer to systems where communication is entirely within, on, and in the immediate proximity of a human body. A WBAN system can use WPAN wireless technologies as gateways to reach longer ranges. Through gateway devices, it is possible to connect the implanted devices in the human body to the internet. Each WBAN has its own MAC address. This way, medical professionals (the FBI, Homeland Security, Fusion Centers, DOJ, COPS and stalkers) can access patient data online using the internet remotely. These government entities can retain control over your muscles and nervous system, pain centers and brain.

the WBAN and the fact that it contains a MAC address inside your body just like a computer or a phone. This distinguishes your system from someone else's system.

A Survey on Wireless Body Area Networks

Excerpt: "two types of devices can be distinguished: **sensors and actuators**. The sensors are used to measure certain parameters of the human body, either externally or internally. Examples include measuring the heartbeat, body temperature or recording a prolonged electrocardiogram (ECG). The actuators (or actors) on the other hand take some specific actions according to the data they receive from the sensors or through interaction with the user. E.g., an actuator equipped with a built-in reservoir and pump administers the correct dose of insulin to give to diabetics based on the glucose level measurements. **Interaction with the user or other persons is usually handled by a personal device, e.g. a PDA or a smart phone which acts as a sink for data of the wireless devices.**"

<https://backoffice.biblio.ugent.be/download/3234782/3234793>

This article shows you that **the WBAN is not healthcare**, it is a government surveillance system to control you and your body whether you like it or not. Authorities have the ability to tell whether you are social distancing or wearing your mask. You will be controlled and have no privacy and your location and what you are doing and saying will be known at all times.

IoT-based **GPS assisted surveillance system** with inter-WBAN geographic routing for pandemic situations

Background

Worldwide pandemic situations drive countries into high healthcare costs and dangerous conditions. Hospital occupancy rates and medical expenses increase dramatically. Real-time remote health monitoring and surveillance systems with IoT assisted eHealth equipment play important roles in such pandemic situations. To prevent the spread of a pandemic is as crucial as treating the infected patients. The COVID-19 pandemic is the ongoing pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).

Methods

We propose **a surveillance system especially for coronavirus pandemic** with IoT applications and an inter-WBAN geographic routing algorithm. In this study, coronavirus symptoms such as respiration rate, body temperature, blood pressure, oxygen saturation, heart rate can be monitored and **the social distance with 'mask-wearing status' of persons can be displayed** with proposed IoT software (Node-RED, InfluxDB, and Grafana).

Results

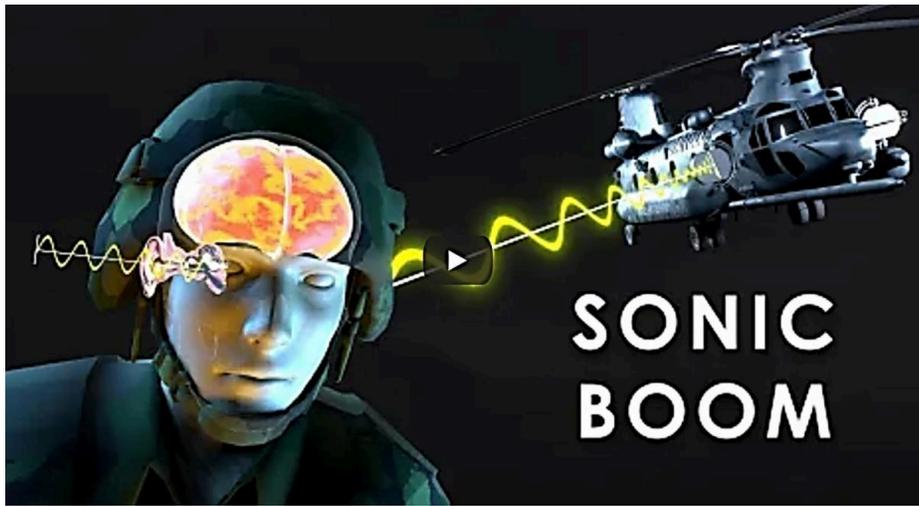

The geographic routing algorithm is compared with AODV in outdoor areas according to delivery ratio, delay for priority node, packet loss ratio and bit error rate. The results obtained showed that the geographic routing algorithm is more successful for the proposed architecture.

Conclusion

The results show that the use of WBAN technology, geographic routing algorithm, and IoT applications helps to achieve a realistic and meaningful surveillance system with better statistical data. [they can find you even if you are 6' underground after burial]

Targeted Individuals are interested in Directed Energy Weapons because they are used on them as weapons. Targeted Justice claims that a vircator or an upgraded vircator called a reltron was used in the raid on Venezuela. There were two effects: (1) to shut down electronics and (2) disable personnel on the ground protecting Maduro. Either one type of weapon performed both effects or two weapons were used, microwave and acoustic separately. Without source information, you can't make assumptions. It is clear though that both energy and kinetic weapons were used. We have an in-depth look into this weapon as it relates to the injuries suffered by the guards in Caracas during the raid to capture Maduro, on our website here: <https://targetedhumans.org/weapons>. There are two interesting videos, one is videos of the real raid at <https://www.youtube.com/watch?v=KoGqrk-DzPE&list=TLGGWalnPKRCZvAwOTAyMjAyNg&t=3s> and the cartoon one below.

Thank you and welcome to TargetedHumans.org. Our first and second newsletters dated January 1 and February 1, 2026 are online at <https://targetedhumans.org/newsletters>. Store and shielding are coming soon.
