Targeted Humans Conference Call

Sunday 8:00 p.m. EST

FreeConferenceCall: 605-475-4779

Access Code: 607080

CALL ID: electricrose222

You can make a difference in educating America and the world about what Targeted Humans really are. [Please make a donation on our website.](https://www.TargetedHumans.org)

We just made a large purchase of a printer that can print hundreds of pages per minute. The better to educate America on who Targets really are.

We have much work to do.

Luna Announces Hearing on MKULTRA Experiments and Its Impact on Public Trust

Published: Jun 23, 2026

WASHINGTON—Task Force on the Declassification of Federal Secrets Chairwoman Anna Paulina Luna (R-Fla.) today announced a hearing on “[Mind Control and Accountability: Uncovering the Truth of the CIA’s MKULTRA Experiments](#).” During the hearing, members will examine the history and timeline of the Central Intelligence Agency’s (CIA) MKULTRA project and its original classification and how the project meets the CIA’s obligation to protect the United States. Members will also analyze the intelligence community’s unwillingness to declassify information related to MKULTRA and how the lack of transparency has reduced Americans’ trust in government institutions.

“The intelligence community has covered up the nature and classification of the MKULTRA experiments for decades. Americans have been misdirected repeatedly and deserve transparency and accountability from the CIA. The intelligence community’s unwillingness to deliver the truth has fueled dangerous conspiracy theories and eroded public trust in the federal government. This hearing aims to explore the history of the MKULTRA experiments, how they have impacted Americans’ wellbeing, and how the intelligence community can win back trust,” **said Task Force Chairwoman Luna.**

WHAT: “Mind Control and Accountability: Uncovering the Truth of the CIA’s MKULTRA Experiments”

DATE: Tuesday, June 30, 2026

TIME: 10:00 a.m. EST

LOCATION: 2154 Rayburn House Office Building

WITNESSES:

- Stephen Kinzer, Senior Fellow in International and Public Affairs, Brown University
- Tom O’Neill, Investigative Journalist, Author of *Chaos: Charles Manson, the CIA, and the Secret History of the Sixties*

WATCH: This hearing is open to the public and will be livestreamed [here](#).

Comment: The purpose of these hearings is to WIN BACK TRUST?
Can you trust people who radiate you, destroy your brain, covertly
implant you with electronic devices and stalk you?

ABSOLUTELY NOT!

**THE PURPOSE OF THIS MEETING SHOULD BE TO EXPOSE
WHAT THE MKULTRA PROJECT IS STILL DOING TO PEOPLE!
Only by ending MKUltra can you stop the abominable crimes.**

Wireless Body Area Network Combined with Satellite
Communication for Remote Medical and Healthcare Applications

Abstract

Wireless Body Area Network (WBAN) is expected to play an important role in supporting medical and healthcare services with increased convenience and comfort. One main advantage of WBAN is that it enables **automatic biosignal collection in real time** which is essential in medical treatment and healthcare vigilance. To harmonize with the strong demands from both medical and healthcare societies, and information and communications technology industries, IEEE 802 Standard Committee set up a task group of TG15.6 to develop an IEEE wireless standard on WBAN. In this paper, we first review the main activities of TG15.6 with the updated status. Then, we present a prototype WBAN system that is implemented by using **ultra-wideband technology**. Multi-hop mechanism is adopted to guarantee reliable connection. Finally, we describe an experimental system that uses the developed **WBAN system by combining with satellite communication** in supporting remote medical treatment and healthcare. In case of less of medical resources such as in emergency, in rural or isolated areas, **such a system is important in sending the corresponding biosignal to a remote [Homeland Security, FBI, law enforcement, InfraGard, etc.] hospital in real time to [track, burn, vibrate, torture and kill Targets]** help patient management. The relative delay of WBAN data delivery via satellite is measured which is dependent on the satellite link capacity.

Medical implant communications system (MICS) is allocated to the same 402-405 MHz in most countries or regions, while wireless medical telemetry system (WMTS) is allocated with different frequency bands. Industrial, scientific and medical (ISM) band and ultra-wideband (UWB) band are available world wide although regulations on UWB are different in countries and regions. Some main frequency candidates for WBAN are:

- MICS band: 402–405 MHz, USA, EU, Korea, Japan, 10 channels of 300 kHz, adaptive frequency agility and 25uW EIRP.
- Med Radio: EU and FCC proposed band 401–402 MHz and 405–406 MHz.
- WMTS band: different in countries and regions. The FCC definition is 608–614 MHz, 1395–1400 MHz, and 1427–1432 MHz.
- ISM bands: 868/915 MHz, 2.4, 5.8 GHz.
- UWB band: different in countries and regions. The FCC definition is 3.1–10.6 GHz

Comment: You need this type of scientific evidence of design and implementation when you are speaking to someone about torture from satellites or drones. Our implants are connected to the WWW.

JOBS FOR STALKERS!

Numerous targeting officer positions are currently open across the Intelligence Community and Department of Defense, with top employers like CACI International, Prescient Edge, and [USAJobs](https://www.usajobs.gov) actively hiring. These roles typically require an active TS/SCI clearance with polygraph, prior military/agency experience, and knowledge of specialized intelligence databases. <https://www.usajobs.gov/job/756782600>

Current openings for targeting roles include:

- **SIGINT Analyst (Technical Targeting Officer):** CACI is hiring at Fort Meade, MD, offering a salary of \$95,500 - \$210,100. This role supports complex worldwide operations and requires extensive background in SIGINT and digital network exploitation. <https://www.caci.com/>
- **Targeting Officer:** The federal government has a continuous opening on USAJobs based in Washington, D.C., with salaries ranging from \$72,254 - \$109,975 per year.
- **Mid. CI Targeting Cell Support:** Prescient Edge is seeking an analyst at Fort Meade, MD, requiring a TS/SCI with CI Polygraph. The role pays between \$80,000 and \$100,000 annually. <https://prescientedge.com/>
- **SOF HUMINT Targeting Officer:** Patriot Defense Group frequently recruits for roles in Tampa, FL, prioritizing candidates with a joint targeting school certification and

specialized IC database familiarity. <https://patriotdefensegroup.com/>

MISSION

Delivering exceptional client-specific training, technical services, and operational support to the Intelligence Community and Law Enforcement agencies for the enhancement of national defense and preservation of freedom.

VISION

To empower our nation as the premier HUMINT training and operational support provider. We enhance our clients' capabilities through professional and innovative services, always staying ahead of emerging threats to national security.

TRAINING AND EXERCISE SERVICES

20 years supporting intelligence, law enforcement, and special operations training. We provide curriculum development, scenario development, platform & field instruction, and diverse roleplaying services.

Human Intelligence

Our Human Intelligence (HUMINT) cadre consists of former certified collectors along the full spectrum of military source operations. Our HUMINTers provide support to a variety of U.S. Intelligence Community clients through operations support, policy reviews, and tradecraft training activities.

ANALYSIS & TARGETING

Our experts conduct analysis using intelligence and information from multiple sources to prepare intelligence products and recommend courses of action. Our products include threat assessments, trend analyses, information papers, and both **kinetic and non-kinetic targeting packages**.

INTELLIGENCE PLANNING

We provide specialized planners who draft inputs to strategic plans, campaign plans, and concepts of operation. Our team has experts in Civil-Military Operations, Information Operations, Military Deception, Military Information Support Operations, Special Technical Operations, and Strategic Communication.

Counterintelligence

We provide former badged and credentialed Counterintelligence (CI) professionals to support the full range of our clients' activities (analysis, collection, cyber, investigations, and operations).

Roleplaying Services

Over the last 13 years, we have mastered the art of providing trained role players for nearly all training scenarios (OPFOR, BLUFOR, Civilians on the Battlefield, Host Nation, Partner Nation, **Surveillance**, and language role players). We believe that training our **role player employees** has been the key to our success in the field.

Platform & Field Instruction

One of the most effective teaching methods our experts have achieved is being able to instruct and mentor while in **role/character**. Our instructors have extensive real-world experience in their respective fields, allowing them to modulate their intensity as direct feedback to the actions of the students.

Curriculum Development

Our certified curriculum developers have designed, developed, and supported courses and exercises for **SOF customers, other DoD elements, the Federal Bureau of Investigation, Customs and Border Protection, other members of the Intelligence Community, and Partner Nations**.

Exercise Support

Our training team conducts all necessary training area development, to include land use agreements, coordination with law enforcement, managing geographically dispersed operations, and logistics and life support for both our employees and our clients' students.

Client-Tailored Products

EKS provides intelligence support services through our Open Source Research Facility. We provide foreign language-enabled research and analysis in response to client Requests for Information (RFI). Our team applies professional intelligence experience, Area of Responsibility (AOR) expertise, and dynamic foreign language skills in support of Operational Preparation of the Environment (OPE), Situational Awareness (SA), Indicators and Warnings (I&W), threat assessments, analytical tradecraft, and Joint and Combined exercise support.
