started over 25 years ago when the young florists' son took a bold step in starting to design silk flowers. Who would have known by then, just how successful he would become in over 75 countries worldwide.

Meet the man behind Silk-ka and his collections. "The love for flowers and arrangements has been raised with me thanks to my father's flower shop. It was there where I first got inspired to further develop my skills in flower arrangements. Once on track it even brought me international recognition. Always looking for new creations and innovations made me discover the endless opportunities of silk. Creating and designing originally Dutch collections. Handmade and high quality. Against all odds I'd decided to go for it! A new concept was born... a new company was founded: Silk-ka. Nowadays we are one of the most renowned designers and exporters of silk flower collections worldwide.

An achievement that was made possible in part by our many loyal and much appreciated customers. We couldn't have done it without you. And to everyone for whom this is a first introduction to us... we can't wait to tell and show you more.

Wall&decò was born in 2005, from an intuition of Christian Benini, founder and creative director of the brand, originally an advertising photographer: in reproducing an image with large leaves to be used as a backdrop for a photographic set, he immediately perceives its high decorative value and possible declinations in the world of furniture.

The suggestion of the images of the backdrop immediately attracts the attention of architects and designers - Wall&decò appears on the market the same day and in a short time contributes to redefine the aesthetics of wall decoration, with a precise and innovative philosophy: no more repetition of patterns and geometries, typical of traditional wallpaper, but enlargements and macro-images with a strong material effect.

Cutting-edge aesthetics, technical research and innovation are the pillars of Wall&decò on a daily basis. Wall&decò offers a design service with various levels of customization, ranging from the adaptation of colors and sizes of the graphics in the collection, to the development of entirely new subjects created specifically for the customer, satisfying even the most challenging project requirements.

Wall&decò: a creative vision in which wallpaper becomes a leading protagonist of contemporary living.
