

GEETHA ENGINEERING AND FABRICATION WORKS

FAQ

1. Can I request a custom design for gates, windows, or grills?

Yes, we provide complete customization options. Our team works closely with you to design and deliver solutions that match your preferences and architectural style.

2. What types of fabrication services do you offer?

We specialize in custom fabrication of MS Grills, Steel & Stainless Steel Gates, Roofing Sheets, Rolling Shutters, Windows, and all types of pipe fabrication works tailored to residential, industrial, and commercial needs.

3. What materials do you use, and how is the quality ensured?

We use premium-grade MS and SS materials to ensure long-lasting durability and corrosion resistance. All our works undergo strict quality checks before delivery.

4. Do you provide on-site measurements and installation?

Absolutely! We offer free site visits for measurements and provide end-to-end installation services to ensure a perfect fit and finish for all our products.

5. How long does it take to complete a fabrication project?

The timeline depends on the complexity and volume of the project. Typically, smaller jobs take 3-5 days, while larger installations may take up to 10-15 days. We always strive to deliver within agreed timelines.

6. Do you offer maintenance or repair services after installation?

Yes, we provide post-installation support, including maintenance and repair services, to ensure your fabricated products stay in excellent condition for years.
