CLEVOR GENTLE SKIN CLEANSER

STUDY & MOA

INGREDIENTS

- Glycerin
- Panthenol (Pro-Vitamin B5)
- Niacinamide
- Sodium Cocoyl Isethionate

Mechanism of Action (MOA)

- Gentle Cleansing
- Sodium Cocoyl Isethionate is a mild surfactant
- It removes dirt, excess oil, and impurities without stripping natural skin oils
- Barrier Protection
- Niacinamide strengthens the skin barrier
- Reduces transepidermal water loss (TEW)
- Helps maintain even skin tone over time
- Hydration & Soothing
- Glycerin draws water into the skin (humectant action)
- Panthenol calms irritation and supports skin repair

MOA summary:

- Cleanses gently → protects skin barrier → hydrates → minimizes irritation

CLEVOR SUNSCREEN SPF 50 PA+++ — STUDY & MOA

CLAIMED BENEFITS

INGREDIENTS

- Hyaluronic Acid
- Niacinamide
- Ceramides
- Vitamin C
- UV filters (not listed, but implied for SPF 50 PA+++)

MECHANISM OF ACTION (MOA)

- UV Protection

SPF 50 blocks ~98% of UVB rays
(sunburn prevention)

PA+++ indicates strong UVA protection (anti-aging & pigmentation prevention)

- Skin Barrier Repair

Ceramides reinforce the lipid barrier
reduce moisture loss caused by UV exposure

- Hydration

Hyaluronic Acid binds water to the skin Prevents dryness commonly caused by sunscreens Repair & Brightening niacinamide helps reduce inflammation and pigmentation Vitamin C neutralizes free radicals and supports skin brightness

MOA summary:

- Blocks UV radiation → prevents DNA & collagen damage → hydrates → supports skin repair
