

Privacy statement

In accordance with the European General Data Protection Regulation (GDPR), Different Perspective has a privacy statement. This applies to the processing of personal data.

I am an alternative and energetic consultant, and I do everything I can to protect the privacy of your data.

The purpose of your data

I need your contact details such as name, e-mail address, telephone number and date of birth in order to do my job. I use address details to address your invoice.

Privacy of the consultations and your data

Everything we discuss via Zoom, by telephone or face-to-face remains between us and is protected by the privacy agreements of Zoom and Fathom to which we, as users of those services, have said 'yes'.

Everything discussed during a consultation remains with me. The data will not be shared with third parties.

Your sessions are stored in my cloud, in case you lose them and want to listen to them again. I keep these session recordings for a maximum of 7 years.

If you do not want me to keep your details such as name, e-mail address, telephone number and the like, please let me know by e-mail and I will remove them from my files.

Sound and video recording

In my experience as a channel, I remember almost nothing from each session. The client is often overcome with emotions during a session, or is unable to properly record all the information at that moment. That is why a recording is made. Online, this is done via Zoom and Fathom. For face-to-face sessions, I use a small sound recorder. After each session, the client receives the recording within 24 hours via my regular email or another digital mail service.

I generally never listen to these sessions again.

Use of client details

After receiving permission from the client, I will send a monthly newsletter to the given email address to share new developments in Different Perspective and interesting spiritual information.

Every client can easily unsubscribe from the newsletter at any time.

Privacy statement subject to change

I reserve the right to change this privacy statement.

Cookies

Necessary cookies help make a website more usable by enabling basic functions such as page navigation and access to secure areas of the website. Without these cookies, the website cannot function properly.

Cookies for statistics. A good website is never finished. We use cookies for statistics to analyze how visitors use our website. This allows us to discover what works well and what we can improve. This data cannot be traced back to a person or IP address.
