ABOUT VDA

A bridge between buyers and the *makers*.

Who we are

VDA Trade Cooperation — operating under VDA E-Ticaret İthalat ve İhracat Ltd. Şti. — is a Türkiye-based marketing & procurement consultancy working in close partnership with Turkish manufacturers. We assist clients from every corner of the world in sourcing the machinery, plants, moulds, equipment and materials they need for construction, infrastructure and industrial projects.

What we do

We listen to your project needs and connect you with experienced, verified suppliers who can meet them — broadening your manufacturer portfolio, opening access to quality products at competitive prices, and showcasing the depth of Turkish industry to the global market. At every stage we serve as a bridge between customer and supplier, handling questions, coordination and technical follow-up.

We are not just a sourcing channel — we act as your procurement partner, ensuring faster, clearer and more cost-efficient purchasing decisions.

— OUR PROMISE

— BY THE NUMBERS

A network built on *scale & trust.*

Years of relationships across Türkiye's manufacturing heartland mean our clients reach more makers, faster, with the right fit the first time.

150+

GLOBAL CLIENTS SERVED

300+

MANUFACTURERS IN NETWORK

14+

PRODUCT & SYSTEM CATEGORIES

1

SINGLE POINT OF CONTACT,
START TO FINISH

From precast plants and heavy formwork to industrial fans and structural steel — our supplier portfolio is wide enough to cover complete projects, deep enough to handle a single specialised requirement.

— OUR SERVICES

Smart procurement, *end to end.*

We simplify and optimise your procurement process by connecting you with reliable Turkish manufacturers — and by handling the friction in between.

01

Global sourcing & supplier access

Direct access to a curated network of Turkish manufacturers. Identify verified suppliers, compare options, reduce dependency.

02

Procurement process optimisation

We manage communication, collect quotations, clarify specifications — cutting response times and your workload.

03

Technical matching & solution support

We understand the project, match the right manufacturer, and help you evaluate technical alternatives with confidence.

04

Cost-efficient procurement

Competitive pricing options, alternative solutions, fewer intermediary costs — better value for your investment.

05

Communication & coordination

A clear bridge between you and the supplier — follow-ups, translation, and smooth collaboration from RFQ to delivery.

06

Market insight & advisory

Market knowledge of Turkish manufacturing, alternative supplier suggestions, and strategic procurement advice.

— PRODUCT UNIVERSE

What we *source*.

A snapshot of the categories on the following pages — from heavy plants and precast moulds to structural materials and industrial systems.

i. Sleeper plants

**Carrousel & Long-Line
Concrete Sleeper
Production Plants**

ii. Paving

**Concrete Pavestone &
Block Machines**

iii. Batching

Concrete Batch Plants

iv. Asphalt

Asphalt Mixing Plants

v. Crushing

**Crushing & Screening
Plants**

vi. Pipes

**Concrete Pipe, Culvert &
Manhole Machines**

vii. Formwork

**Heavy-Type Formwork
Systems**

viii. Moulds

**Precast Moulds & Tunnel
Formworks**

ix. Modular

**Modular Formwork & Pre-
stressing**

x. Scaffolds

Scaffolding Systems

xi. Steel

**Iron & Steel Products —
Sheet, Profile, Pipe**

xii. Piling

Bored Piling Equipment

xiii. Stones

**Bricks & Stones for
Architecture**

xiv. Washing

**Industrial Parts Washing
Machines**

xv. Fans

**Industrial Ventilators &
Compressors**

Carrousel & Long-Line *Concrete Sleeper* Plants

Complete turnkey production lines for pre-stressed concrete railway sleepers (cross ties) — engineered for high output, dimensional accuracy and a long service life under heavy rail loads.

i. Carrousel systems

Automated cyclic production with stationary forming, pouring and curing stations.

ii. Long-line systems

Continuous stressing-bed configuration for high-volume sleeper output.

iii. Pre-stressing equipment

Tensioning frames, anchors and tooling for reliable pre-stress transfer.

iv. Moulds & tooling

Standard-gauge, broad-gauge and special profile moulds on request.

— PAVING & BLOCK

Pavestone & *block* machines.

Fully automatic, semi-automatic and stationary lines for producing concrete paving stones, kerbstones, hollow blocks and architectural concrete products — covering everything from small municipal works to high-volume industrial yards.

i. Automatic block lines

Vibro-compaction, multi-layer production and palletising.

ii. Wide mould library

Pavestones, kerbs, hollow blocks, edges, slope & garden stones.

iii. Colour & surface options

Double-layer pigment dosing, washed-finish and shot-blast lines.

iv. Capacities to suit

From compact mobile lines to fully-automatic high-capacity plants.

Batch · Asphalt · *Crushing* & Screening.

Stationary and mobile plant solutions for ready-mix concrete, hot-mix asphalt, and aggregate processing — built to perform across geographies and project scales.

i. **Concrete batch plants**

Stationary and mobile, with twin-shaft or planetary mixers.

ii. **Asphalt mixing plants**

Hot-mix lines designed for efficiency, sustainability and consistent output.

iii. **Crushing & screening**

Optimised reduction and separation of rock, gravel and sand.

iv. **Sand washing systems**

Bucket-wheel washers, log washers and dewatering screens.

— PIPES & CULVERTS

Concrete *pipe* machines.

Advanced production technology for durable concrete pipes, culverts and manholes used in stormwater, sewage, irrigation and infrastructure projects.

i. Vertical & horizontal lines

Vibration-compaction and roller-suspension production methods.

ii. Broad diameter range

From small drainage pipes up to large culvert sections.

iii. Reinforcement cages

Cage-welding equipment and integration with reinforcement workflows.

iv. Manhole & box culverts

Dedicated moulds and presses for chamber, ring and box-culvert production.

Formwork & *scaffolding* systems.

Heavy-type, modular and project-specific formwork solutions — engineered for high cycle counts, dimensional accuracy and safe site assembly.

i. Heavy-type formwork

For walls, columns, foundations and infrastructure elements.

ii. Modular formwork systems

Reusable panels and accessories for fast cycle times on residential & commercial sites.

iii. Tunnel formwork

Half-tunnel and full-tunnel systems for repetitive load-bearing structures.

iv. Scaffolding

Frame, ringlock and shoring systems for safe access and slab support.

— PRECAST MOULDS

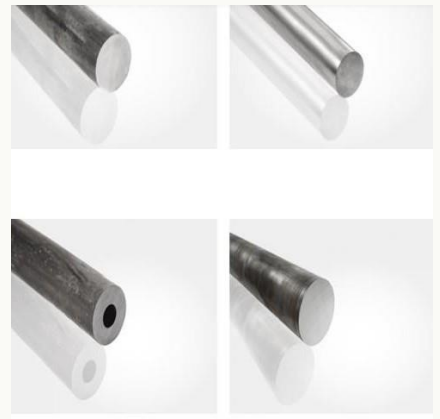

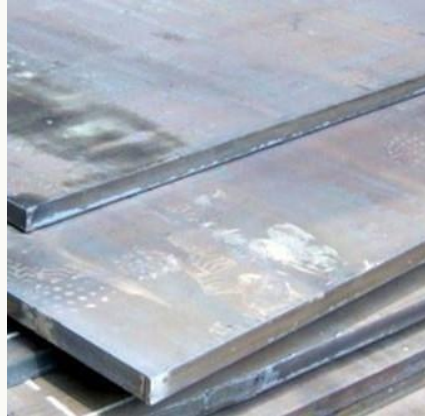

Precast moulds & *specialty* formwork.

Custom-engineered moulds for bridge beams, U-girders, columns, box culverts, retaining walls, façade panels, sleepers, stair-units, traffic barriers and architectural precast elements.

MATERIALS

Iron & *steel* products.

A complete range of iron and steel products for construction, infrastructure and industrial applications — sourced from Turkish mills with consistent quality and lead-time visibility.

i. Flat products

Hot & cold-rolled coils, sheets, plates.

ii. Structural profiles

IPE, HEA, HEB, UPN, angles & channels.

iii. Pipes & tubes

Welded, seamless, ductile-iron and ERW pipes.

iv. Long products

Rebar, wire rod, billets & round bars.

12 · CONSTRUCTION EQUIPMENT

Bored piling *equipment.*

Replacement and OEM components for bored piling and deep-foundation works — sourced for compatibility with major rig brands and configured for the ground conditions of your project.

i. Casing Drive Adapter

Compatible with major OEM rigs.

ii. Chasing Shoes & Casings

Wear-resistant components for tough ground.

iii. Core Barrels & Augers

For rock, soft soil and mixed strata.

iv. Tremie Pipes & Buckets

Concreting accessories and cleaning buckets.

— A SEPARATE CATEGORY —

13 · ARCHITECTURAL MATERIALS

Bricks & *stones.*

High-quality bricks and architectural stones for façade, cladding, paving and landscaping. Supplied for residential, commercial and infrastructure projects from a curated set of Turkish suppliers — independent of, and unrelated to, our construction-equipment range.

Industrial parts *washing* machines.

Spraying, dipping and ultrasonic systems for mass- production cleaning of metal parts — used in automotive, appliances, electronics, medical and defence industries.

i. Ultrasonic with robot transport

Micron-level cleaning with full Cartesian automation, no operator required.

ii. Multi-stage process

Pre-wash · ultrasonic · rinsing · passivation · drying.

iii. Wide application range

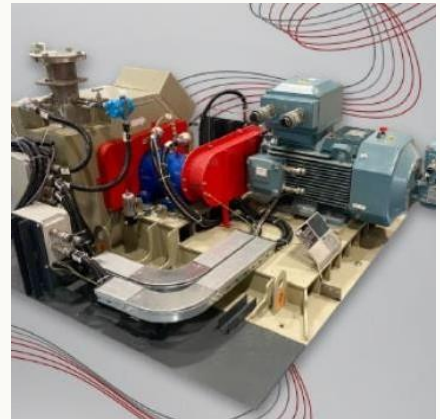

Engine blocks, valves, machined parts, PCBs, surgical instruments.

iv. Pre-coating surface prep

Removes contaminants ahead of painting and coating lines.

INDUSTRIAL SYSTEMS

Industrial *ventilators* & compressors.

**i. Radial fans**

Large & special, hot-gas circulation, material handling, wear-protected, sealed and high-pressure variants.

ii. Turbo compressors

Single and multi-stage radial gearbox compressors — up to 1.5× atmospheric pressure differential.

iii. Ex-proof fans

For potentially explosive environments — anti-electrostatic materials, Ø400-Ø1000 mm range.

iv. MVR / concentrating fans

Centrifugal vapour re-compression for evaporation units, up to 300 m/s rotor speeds.

Standard and special industrial ventilators tailored to the sector — sealed, wear-protected, or fully Ex-proof configurations on request.

— WHY WORK WITH US

Not just sourcing — a *partnership*.

Choosing VDA Trade Cooperation means working with a partner whose success is measured by the success of your project.

✓ **Strong manufacturer network**

Curated, verified relationships across Türkiye's industrial heartland.

✓ **Fast, clear communication**

One responsive point of contact — no language friction, no waiting.

✓ **Cost-effective sourcing**

Better pricing options and reduced intermediary costs.

✓ **Tailored project solutions**

Technical matching against your real-world requirements.

✓ **Flexible & partnership-driven**

We grow with you — long-term collaboration over one-off transactions.

✓ **UK & Türkiye presence**

Two offices, one team — easier contracting, faster on-the-ground response.

Let's *work together.*

Whether you have an ongoing project or are planning future investments – we are ready to support you. Tell us what you need and we'll bring the right manufacturers to you.
