Vanguard 360

About

At Vanguard 360, our mission is to deliver cutting-edge RPA and APA solutions using UiPath to streamline HHS operations, reduce costs, and improve efficiency for government agencies and its prime contractors.

We specialize in eliminating manual inefficiencies and reducing costs by 30-50% while accelerating service delivery and improving public health outcomes.

Experience

- ❖ **Medicare Claim Validation Bot:**
Automates initial validation of Medicare claims, checking for required fields and provider IDs, reducing processing time by 50%.
- ❖ **Provider Enrollment Data Extraction:**
Uses UiPath to extract and validate provider data from PDFs, cutting enrollment time by 40%.
- ❖ **Public Health Data Aggregation Bot:**
Automate the collection and aggregation of public health data from multiple sources into a centralized database.

Core Competencies

- ❖ **Healthcare Automation Workflows:**
Medicare/Medicaid claims processing, NIH grant management, CDC public health data aggregation, FOIA request automation.
- ❖ **Agentic Process Automation (APA):**
Knowledgeable in integrating advanced AI agents to create flexible, responsive workflows capable of autonomous decision-making and task execution.
- ❖ **Robotic Process Automation (RPA):**
Proficient in designing and deploying automation workflows using UiPath. End-to-end automation services, including process analysis, development, deployment, and maintenance.
- ❖ **RPA User Training:**
Designing and delivering customized training programs to upskill government staff, primes, and stakeholders in RPA/APA tools (e.g., UiPath) for long-term automation success.

Differentiators

- ❖ Committed to understanding the needs of the healthcare industry
- ❖ Tailored automation and interoperability solutions
