45 weeks – Total hours: 850

Mode of Delivery:

Online (Virtual Classes)

Program Overview

JRS College's Web Development diploma program has the right training to help you start your career designing and developing web applications. Learning from professional instructors who have years of experience in programming and app development, you'll grow your skills quickly in small, focused classes, with plenty of time set aside for one-on-one feedback

Training in HTML5, Java, and JavaScript

A major part of becoming a successful web developer is mastering the many programming languages and software used in the field. Hands-on technical training in both traditional programming and object-oriented methodologies is the key to growing your skills.

What you learn:

In the Web Development diploma program, you'll gain an understanding of the fundamentals of web development, including training in HTML5, CSS, Dreamweaver, JavaScript, PHP and MySQL, JQuery, Python, and more. You'll also get thorough training in advanced web technologies, with emphasis placed on integrating Node.js, MongoDB, and Angular Web Development into fully functional web applications, and an introduction to building apps with AWS, the leading cloud computing platform.

In the Web Development diploma program, you'll gain an understanding of

- **Fundamentals of web development:**

- HTML5 • CSS • Dreamweaver • JavaScript • PHP • MySQL
- JQuery • Python

- **Advanced web technologies:**
