

Pet Microbiome Test

Your Pet's Personalized Report Includes:

- A simple Gut Health Score
- Profile of beneficial vs. harmful microbes
- Functional insights (vitamin & neurotransmitter production)
- Risk indicators for digestive, skin, or behavioral issues
- Personalized recommendations on diet, probiotics, supplements & Veterinary Support

What Makes Us Unique

- ✓ Advanced Species & Strain level precision.
- ✓ Clinically designed personalized reports
- ✓ Tailored diet, supplement & lifestyle plans
- ✓ Clinical-backed insights

Every wag, purr, & cuddle begins with a healthy gut.

With our Pet Microbiome Testing, you can unlock the invisible world that drives your pet's happiness, energy, and longevity.

Discover your pet's unique microbiome & help them thrive.

Is Your Pet Trying to Tell You Something?

When your pet is full of life, it's their gut microbiome trillions of tiny microbes quietly working. But when this harmony is disturbed, it can show up as more than just an upset stomach.

- Recurrent diarrhea or bloating?
- Excess shedding or skin infections?
- Unexplained anxiety or aggression?
- Poor appetite or fatigue?

These signs could all point to one hidden imbalance: **Gut Dysbiosis**

What Is the Pet Gut Microbiome?

Your pet's gut isn't just an organ—it's a living ecosystem. This "microbial factory" is essential for:

Digestion

Digesting food and making vitamins (B12, K2).

Immunity

Training the immune system to fight pathogens.

Protection

Healing and protecting the gut lining.

Mood

Producing neurotransmitters like serotonin and GABA.

When the Gut is Unhappy, Diseases Begin

Gut dysbiosis is linked to a wide range of chronic conditions.

- Digestive Disorders
- Skin & Allergy Issues
- Obesity & Diabetes
- Anxiety & Cognitive Decline

Stop guessing

Using advanced shotgun metagenomic sequencing, our test reads the complete DNA profile of your pet's gut microbes—identifying not just who's there, but what they're doing.

How It Works

1

At home stool collection kit

2

Advanced NGS (Shotgun Metagenomics)

3

Personalized Report with prebiotic & probiotic insights and Customized Nutrition Plans

4

Follow-Up Testing, Progress Tracking & Veterinary Support
