

# HOW TO DECORATE A CLAY TILE

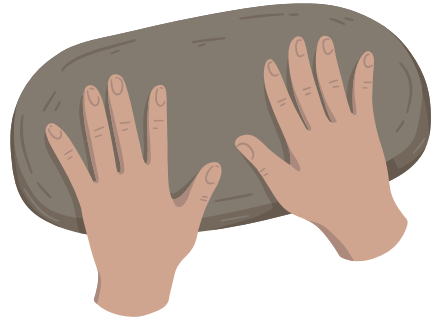

**Inspired by Nature**

## STEP 1

Prepare the Clay: your clay should be rolled to about 6mm thick and let it allow it to dry a little.

## STEP 2

Place the Plant: Lay your chosen plant(s) on top of the clay. If using delicate plants, you can place a plastic sheet or wax paper over it to protect it.

## STEP 3

Press the Plant: Use a rolling pin to gently press the plant into the clay. Roll evenly to ensure the plant impression is consistent.

## STEP 4

Remove the Plant: Carefully peel away the plant to reveal its impression in the clay.

## STEP 5

Refine the Design: Use a small tool or your fingers to clean up any excess clay around the impression if needed.
