THIRD PARTY RISK MANAGEMENT TRAINING

Are your vendors putting your business at risk?

Your organization depends on third-party vendors for essential services, but how do you ensure they don't become your biggest security vulnerability?

HERE'S THE REALITY:

-A single weak vendor can expose your business
to data breaches, compliance failures,
and reputational damage.

-Many organizations skip security reviews before
onboarding vendors—or worse, don't
audit them regularly.

-Contracts often lack proper security clauses,
leaving businesses open to hidden risks.

That's where Third-Party Risk Management (TPRM) comes in!

In our in-depth TPRM training, you'll learn how to:

Implement real-world strategies used by top organizations to reduce vendor risks.

Conduct security & quality assessments before hiring vendors.

Audit vendors during contract renewals to ensure they meet your security requirements.

Review vendor contracts with a security-first approach to avoid legal & compliance risks.
