JUNE 26 • 27 | CENTRO DE CONVENCIONES LA PAZ

THE TELECOMMUNICATIONS MARKETPLACE

WHO ARE WE?

Expo CSMX is the evolution of 11 years in the ICT market, starting in 2012 with the cable operator´s industry and gradually integrating the broadcasting, ISP´s and now value- added services, entertainment, and consumer electronics, generating value, presence, and diffusion.

GOALS

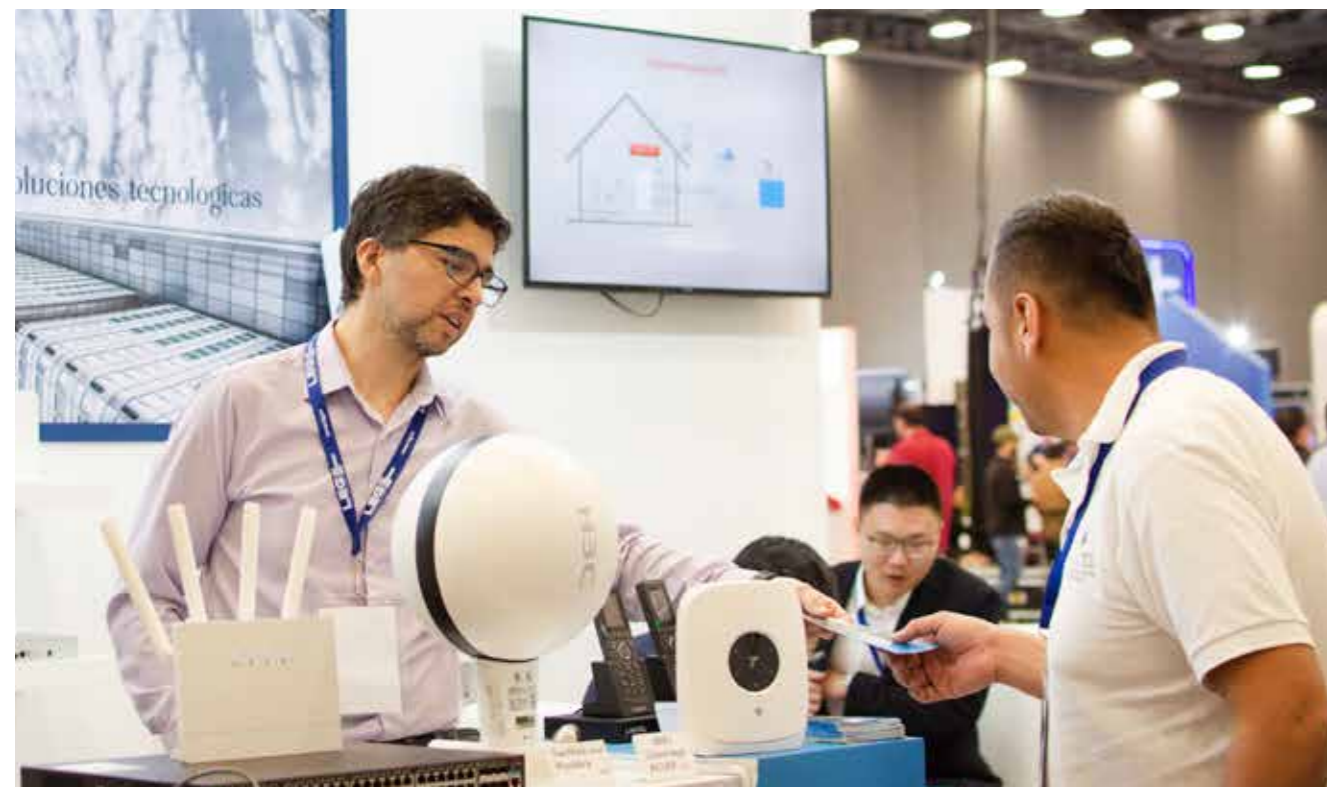

1.

Generate a business environment through a space to showcase ICT products and services for the technology services industry, such as ISPs, cable operators, data transport, content providers, broadcasting, consumer electronics and entertainment.

2.

Training and diffusion of the main technologies trending.

3.

Creting a slimmer line between networks, services, equipment and consumers, which is why we are working to unite them under one roof.

4.

Generate an environment that generates alliances between participants and visitors, as well as government and industry.

5.

Promote a close relationship between humans and technology.
