

## FEATURES & BENEFITS

- Pairing with **Advantage (MA1)**, our patented worm-powered biological product that opens stomata & stimulates nutrient mobility
- **BioMaxx** is designed to fill the “hidden hunger” of plants, which cannot be noticed until it’s too late
- Premium foliar fertilizer, used around the 7-8 leaf stage
- Best practice is to use after **AnneMaxx SoilMaxx**
- Recommended alongside **AnneMaxx MicroMaxx Package** if a tissue sample has come back with a deficiency
- Can replace a farmer’s UAN/Foliar N application
- 30% organic nutrients

## Application Guidelines

- Apply at herbicide and fungicide time as foliar application timing.
- Crops: Canola, Pulse crops, Cereals, Potato, Orchard crops, Corn, Forages, Turf.
- Compatible with most products for foliar applications; a jar test is recommended prior to application.

- For best results, this product is designed to be mixed with **Advantage (MA1)** at the time of application or up to 48 hours prior.

### **Foliar Application:**

- Mix **Advantage (MA1)** with **BioMaxx (MA6)** at a 1:1 ratio, diluting 2-4L of the combined product to 40-60 L/acre.
- Always recommended to pre-condition your water for pH and hardness.
- Total Nitrogen
- 12.00%
- Available phosphoric Acid
- 4.00%
