SUPPORT BONE GROWTH & REMODELING

Magnesium, Zinc, and Boron aid in bone formation and repair. Collagen contributes to the flexibility and structure of bones.

FILL DIETARY GAPS

Many people don't get enough calcium, vitamin D, or magnesium from food alone. Supplements help meet daily needs, also ensured that calcium from your diet or supplement is properly absorbed & utilized by the body.

IMPROVE CALCIUM ABSORPTION

Vitamin D3 increases calcium absorption from the gut. Vitamin K2 directs calcium into the bones and away from arteries, helping prevent arterial calcification.

STRONGER BONES AND TEETH

Calcium in multivitamins is good for strong teeth and bones, and blood clotting.

PREVENT BONE LOSS & OSTEOPOROSIS

Calcium + Vitamin D3 work together to maintain bone density and slow down bone loss, especially in older adults or postmenopausal women. Supplements help reduce the risk of fractures and brittle bones.

HEALTHY BLOOD AND MUSCLE FUNCTION :

Iron in multivitamins is good for maintaining healthy blood and muscle function.
