SUPPORTS IMMUNITY LEVELS

Supports endothelial function and blood vessel health. Antioxidant and antimicrobial; supports immune system function.

METABOLIC & VASUCLAR SUPPORT

Arjuna helps to manage natural antioxidants that reduce oxidative stress. Improves the circulation and may help manage high blood pressure and fast heartbeat.

SUPPORTS ENERGY PRODUCTION IN HEART CELLS

CoQ10 is vital for producing ATP, the energy currency of cells. The heart, being an energy-demanding organ, relies heavily on CoQ10 to maintain strong and consistent contractions.

IMPROVES BLOOD VESSEL HEALTH

Enhances endothelial function, helping arteries stay flexible and healthy. Promotes vasodilation (widening of blood vessels), improving blood flow and reducing blood pressure.

PROTECTS THE HEART MUSCLE (CARDIOPROTECTION)

May reduce damage from ischemia (low blood flow) and improve cardiac mitochondrial function, especially under stress or aging.

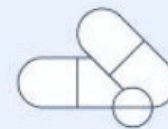

HELPS LOWER BLOOD PRESSURE

CoQ10 may reduce both systolic and diastolic blood pressure slightly, especially in people with hypertension. Works by helping relax blood vessel walls (vasodilation).
