Company Profile

Doc.No.: Profile_012_2026

About Us

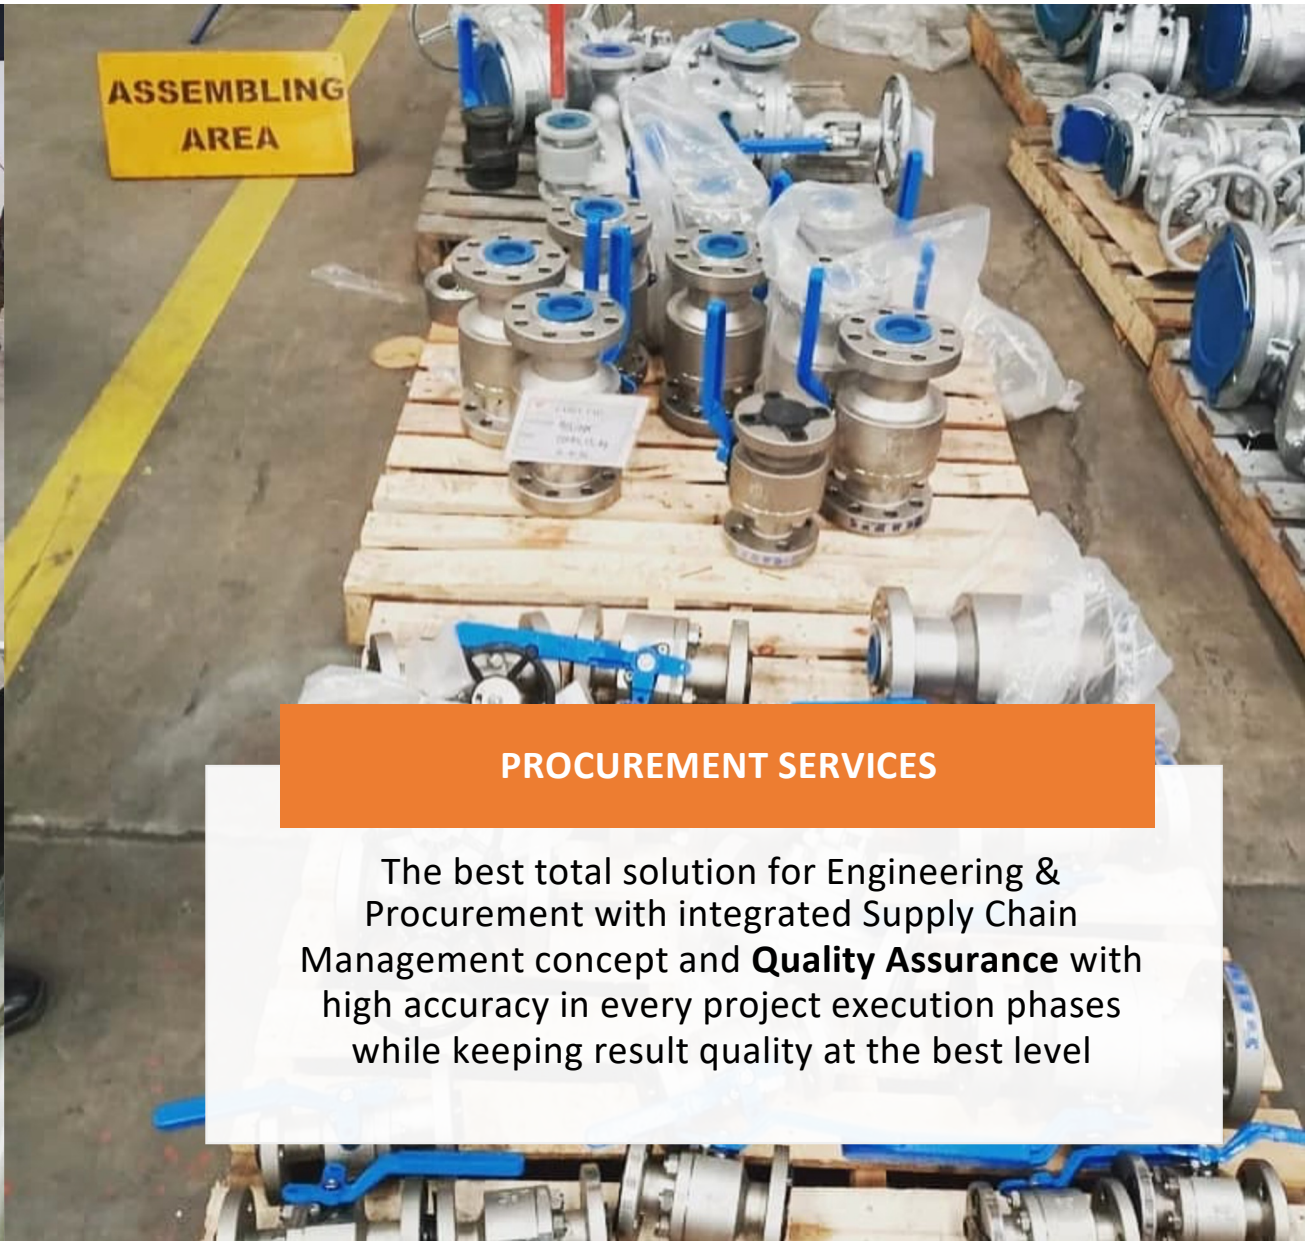

- PT Multi Niaga Cakrawala established in May 2020 with our wide range of services Including:
 - 1) Engineering & Procurement
 - 2) NDT (non destructive testing): conventional & advance
 - 3) Metering Calibration System
 - 4) Provision of Man Power Services
 - 5) IT Solutions: Data Center, Networking, Server & Storage, Client Computing, Wireless & Security
 - 6) Technical HSE Assurance Services
- We believe our services are comprehensively meet the Standard's Industry of Oil & Gas, Geothermal, Power Plant, Marine, Aviation, Construction.
- We prioritize quality and work safely.

Engineering & Procurement

We strongly believe that we are a partner of experience specialists, would be qualified as a good business partner of your respectable firm and would have a chance to serve you with competitive cost and best quality products.

PROCUREMENT SERVICES

The best total solution for Engineering & Procurement with integrated Supply Chain Management concept and **Quality Assurance** with high accuracy in every project execution phases while keeping result quality at the best level

Inspection and Technical Testing Services

- Conventional NDT Services : Ultrasonic Testing, Magnetic Testing, Penetrant Testing, Eddy Current Testing, Visual Test (Boroscope), Radiography Testing.
- Advance NDT Services : Acoustic Eye, Short / Long Range Ultrasonic Test, Phased Array Ultrasonic Test, Pulse Eddy Current Testing, Magnetic Flux Leakage.
- Calibration Metering System: Legal Custody (METROLOGI)

Provision of Man Power Services

About Us

PT Multi Niaga Cakrawala has wide range of services including Data Center, Networking, Server & Storage, Client Computing, and Wireless & Security. Our services comprehensively meet the Standard Industry of Oil & Gas, Geothermal, Power Plant, Marine, Aviation, and Construction. We prioritize quality and work safely.

- Quality : Quality Management System ISO 19001:2015.
- Safety and Health : ISO 45001:2018 Occupational Health and Safety Management System.

Data Center Maintenance

With years of hands-on experience, we offers the following solutions in the field of Data Center Maintenance :

24/7 Managed Services

Managed solutions for data centers, including NOC and SOC support, as well as layered IT support services to address workforce shortages.

Preventive and Corrective Maintenance

Provides maintenance services for IT infrastructure to ensure optimal performance and performance.

M&E Cable Services

Provides maintenance services for IT infrastructure to ensure optimal performance.

Commitment to Reliability

Committed to providing reliable and comprehensive solutions to support customer IT infrastructure needs.

Certified Technicians

Our technicians are certified and trained to handle the most advanced systems from leading container manufacturers. We continually update our skills to stay ahead of industry standards.

INTEGRATED IT SOLUTION

- We provide Strategic Integration of IT Infrastructure, Software, Automation and Services.
- A well-orchestrated integration aligns technology investments with organizational objectives, enhances operational efficiency, and unlocks innovation potential.
- The integration of IT infrastructure expertise and industrial automation capabilities enables us to deliver high-end, tailored solutions to meet a wide range of client needs.

 **Complete
IT Infrastructure & Industrial
Solutions**

Line of Business

IT Infrastructure Specialist

We are providing IT hardware and software, also professional services including project management, installation, testing and training.

Managed Services

We delivers comprehensive managed services and proactive maintenance solutions to ensure the optimal performance and reliability of your IT infrastructure.

Line of Business

Mechanical and Electrical

We offers end-to-end solutions encompassing the design, supervision, and installation of electrical and mechanical systems across a diverse range of facilities, including office buildings, hotels, airports, and manufacturing plants.

Industrial and IOT Solution

We deliver tailored Industrial and IoT solutions aligned with your specific requirements, covering Building Automation Systems, Factory Automation, Robotic Applications, and IoT Integrations.

Our Expert Teams

We are supported by a team of dynamic, certified professionals across various IT domains, continuously enhancing their knowledge and skills to stay aligned with the latest industry advancements.

Technology Partnership

We establish strategic partnerships with leading global IT and industrial solution principals.

01 Networking, Wireless & Cyber Security

02 Video, Audio & Multimedia

03 Security Access & Monitoring

Technology Partnership

04 Server, Storage & Client Computing

05 Software Licensing

06 Printer & Scanner

Technology Partnership

07 Network Cabling, Fiber Optic & Electrical

08 UPS & Data Center

Core Capabilities & Solution

We offer a comprehensive range of solutions within our core business areas:

- IT infrastructure and industrial solutions
- Physical & cyber security solution
- Managed service & maintenance solution
- Mechanical electrical cabling services
- Display and audio solution
- Smart meeting solution

Core Capabilities & Solution

IT Infrastructure Solution

IT infrastructure, also called technology infrastructure, is what enables a company to build and run the applications that underpin its business. It includes compute, network, workplace, data platform and edge capabilities.

IT INFRASTRUCTURE ASSESSMENT

We offer IT infrastructure consultation services for your IT requirements such as interconnecting data and network between company, server requirements, security access monitoring, etc. We also provided wireless infrastructure assessment for your company using our comprehensive tools for wireless access point signal assessment.

IT INFRASTRUCTURE IMPLEMENTATION

We offer a comprehensive range of services and products in information technology infrastructure that will empower your business to focus on your core strengths. A wide range of IT infrastructure product including network, wireless technology, multimedia, security access monitoring, server storage, client computing, software license, printer, scanner, data centre devices, etc.

Core Capabilities & Solution

Physical & Cyber Security Solution

IT perimeter security is the process of securing a network perimeter by implementing a combination of software, devices, and techniques. Some strategies or guidelines used within IT perimeter security may include passive or active surveillance, threat detection and pattern analysis.

PHYSICAL SECURITY PERIMETER

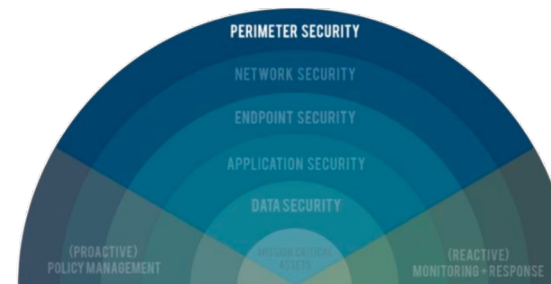

We offer wide range solution for your physical security requirement using surveillance camera CCTV, integrated video management system, access control system and smart IoT application in your critical or restricted area.

CYBER SECURITY SOLUTION

A cyber security threat refers to any possible malicious attack that seeks to unlawfully access data, disrupt digital operations or damage information. We provide solution on each layer cyber security category.

We offer cryptography services to encrypt data on your database for your data security, web application firewall and authentication services for your application security, next-gen anti virus for your endpoint security, advanced firewall and intrusion prevention system for your network security layer.

Core Capabilities & Solution

Managed Service & Maintenance Solution

As part of IT Solution for your needs, we committed to give best services through our managed services and maintenance services solution.

NOC / SOC DATA CENTER

We provide managed service for data centre facility, to maintain data centre on 24x7 basis. We provided Network Operation Centre (NOC) and Security Operation Centre (SOC) services for your data center solution.

MANAGED SERVICES FOR IT SUPPORT

We provide managed service for IT support, for your requirement on lack of IT manpower on your company. Our services provide layering support for escalation on each layer.

PREVENTIVE & CORRECTIVE MAINTENANCE

To maintain your IT infrastructure, we provide services for Preventive Maintenance and Corrective Maintenance. The SLA can match with your 8x5 Working Days or 24x7 Operation Hours.

Core Capabilities & Solution

Mechanical Electrical Cabling Services

To achieved end to end solution to our customer, we provide cabling solution services for your IT and Production Infrastructure.

UTP / FTP NETWORK CABLE

We provide installation service for UTP or FTP Network Cable with specification Cat5 / Cat6 / Cat7 for your IT Cabling requirement. Including cable relocation services and cable rack tidy up services.

FIBER OPTIC CABLE

We provide installation service for Fiber Optic Cable (Single Mode and Multimode) either Outdoor or Indoor. Including Fiber Splicing Services and Fiber Optic Testing with OTDR Tools

ELECTRICAL CABLE

We provide installation service for Electrical Cable for IT rack and data centre requirement supply. Include electrical installation to working desk and production line.

Core Capabilities & Solution

Display and Audio Solution

IT infrastructure, also called technology infrastructure, is what enables a company to build and run the applications that underpin its business. It includes compute, network, workplace, data platform and edge capabilities.

DISPLAY SOLUTION

Display solution refers to the combination of hardware and software components designed to present visual information on a screen or other visual output device. It encompasses the entire system that enables the display of content, whether it be images, videos, text, or interactive applications.

- Indoor & outdoor videotron
- Video wall
- High-brightness projector
- Digital signage, etc

AUDIO SOLUTION

An audio-visual (AV) solution refers to a comprehensive integration of audio and visual technologies to create an immersive and effective multimedia experience.

- Meeting and conference room
- Ambient soundscapes
- Event Spaces and Entertainment

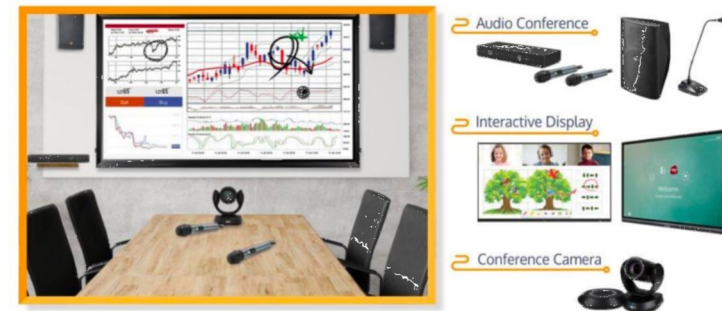

Core Capabilities & Solution

Smart Meeting Solution

Our smart meeting room solution integrates advanced audiovisual systems and seamless collaboration tools, enabling efficient discussions, remote connectivity, and decision-making for university teams and stakeholders.

HYBRID MEETING ROOM

We provide meeting rooms equipped with integrated smart devices, delivering a highly productive experience for participants, whether attending in person or remotely. Additionally, our solution ensures a neat and aesthetic space, free from cluttered cables.

Huawei Fusion Module 1000A Spare Part Maintenance

PT Multi Niaga Cakrawala do maintenance for Huawei Fusion Module 1000A, including:

- Preventive and corrective maintenance PAC Netcool 5000
- Preventive and corrective maintenance UPS 5000
- Preventive and corrective maintenance fire suppression system FM 2000
- Preventive and corrective maintenance Vesda system

Fusion Module 1000A

iManager NetEco6000

UPS 5000-E-80 KVA

Renewal of License for iManager NeEco6000 (EDCM) VR00R021

We assist in renewing licenses for the iManager NeEco6000 system, ensuring your energy management platform is up to date with the latest features and security enhancements.

Battery Replacement for UPS5000 Type VLRA

We offer replacement and maintenance services for VLRA batteries used in UPS5000 systems, ensuring continuous power supply and extended battery life.

PAC (Precision Air Conditioning) Filter Maintenance

Our team specializes in regular cleaning and replacement of PAC filters to maintain optimal air quality and ensure efficient cooling performance in your data center.

Gas Fire Suppression System FM200 Maintenance

We provide maintenance services for FM200 fire suppression systems, guaranteeing that your fire protection system is fully operational and compliant with safety standards.
