HIDEA

NEW LAUNCH

Power creates fantastic life

HIGHLIGHTS

- Independent pencil-type ignition coil (COP), more efficient use of ignition energy, better combustion performance, more reliable ignition system.
- Variable valve timing (VVT-i) adjusts the intake valve timing according to engine's operating conditions to optimize the amount of air entering to the cylinder and improve combustion efficiency.
- Digital control system: The ECM of the digital control system remotely communicates with engine ECU, enabling intelligent remote control of single, dual or multiple engines.
