Water is essential for Life and its storage is a need of time. Water Storage Tanks are used to store water for later use.

One must, therefore, know everything about the water storage tank before buying it for their homes. Water storage tanks comes in different shapes, materials, durability, strength, and sizes.

For Long Lasting Tanks Always Consider:  
Healthy | Safe | Durable | Reliable | Reputed  
Company Product

## — THINGS TO REMEMBER —

# BEFORE BUYING BEST WATER STORAGE TANK

### ● ENSURE TANK QUALITY

*Drinking water should be stored in water tanks made with toxin-free plastic material so that the water does not change and is safe for use. So, water storage tanks must be made of “FDA” Approved 100% Virgin Food-Grade Polyethylene resulting smooth and clean interior of tank. The outer layer shielded be ultraviolet (UV) protected that will ensure water is unchanged and safe for use.*

### ● WARRANTY ASSURANCE

*Choose a brand which not only gives u maximum warranty but is also reputed, as reputation is built through its sustainability in the market with assured warranty & better product quality . So, one should choose a reputed brand while buying water storage tank.*

### ● INSTALLATION

*Whether the tank is installed at the ground level or on the top of a building, it influences the water pressure, which in turn, can affect the supply of water. Always get the Water Tank installed by experienced or skilled installer, ensure that the entire bottom of the tank is supported & no stone or any hard or sharp objects are there underneath the tank, also make sure that “installation Manual” is strictly followed.*

### ● BRANDED COMPANY

*Buying an ISI marked water tank is not necessary. Brand’ means ‘Reliability’ buying a reputed brand water tank is the most important factor. A good brand company sustain long in the market. Ensure that the brand you choose has it’s name embossed on the tank.*

# KEEP IT CLEAN, KEEP IT GREEN
