ATRIGALVANJOYERIA.COM

After living for a while in England, my fascination with the elements of design and motivated by sewing knowledge of my family led me to study fashion design, where I developed skills in all areas of visual art including costume on films and advertising, being a costume designer for award-winning feature films and assistant of important costume designers and international stylists.

Since 2009 I have my fashion-jewelry brand ([Galvanycó-Atri Galván joyería](#)) where I developed the designs, screen printing, clothing and material testing.

In recent years I have developed my work as a contemporary jewelry artist, participating in several exhibitions in art galleries.
