About Us

Jejak Kaki is a psychological development center established in 2006 by three psychologists who graduated from the University of Indonesia and shared a strong passion for the field of education. In 2019, Jejak Kaki came under new management, which continues to have a deep interest in the field of psychology.

Jejak Kaki is deeply committed to helping children, adolescents, and adults understand themselves better.

We believe that individuals who truly understand themselves will be able to grow, reach their full potential, and actively contribute to society.

Vision & Mission

VISION

To become a platform that nurtures a happy generation and empowers individuals to actualize themselves in society.

MISSION

To help children, adolescents, and adults understand themselves and reach their full potential through various programs and activities we provide.

ABOUT US

Core Values

EXCELLENCE

We understand the importance of delivering high-quality work, therefore we carry out every task with full responsibility and dedication.

TEAM WORK

We believe that good teamwork will help us produce fresh and creative work for the clients we serve.

GROW TOGETHER

We believe that every encounter with our clients brings new learning experiences, for both the clients and us, to continue growing and becoming better.

COMMUNITY IMPACT

We believe that our presence should create a positive impact on the surrounding community through the programs we develop.

Our Expertise

PSYCHOLOGICAL ASSESSMENT

Psychological assessment services provided to help clients understand their potential and personality in a comprehensive way. These services can be conducted in our clinic or at institutions that require our presence.

COUNSELING

Counseling services provided to clients with various concerns, aimed at helping them understand themselves better and empowering them to face different psychological challenges.

TRAINING/SEMINAR

Learning programs designed creatively and innovatively to develop insight and skills for individuals or communities. These programs can be conducted both online and offline.

PSYCHOLOGICAL CONSULTING

Mentoring and assistance for institutions that require the presence of psychologists in developing mental health programs or psychological services.

Psychological Assessment

SCHOOL READINESS TEST

Definition: A psychological assessment used to measure the readiness of early childhood (usually ages 5–7) to enter elementary school.

Test Objectives:

- To assess a child's physical, mental, emotional, and social readiness to participate optimally in elementary school learning activities.
- To identify the child's strengths and weaknesses in various developmental areas, such as fine motor skills, language, and gross motor skills.
- To provide recommendations regarding the child's readiness to enter elementary school and note any preparation that may be needed.

Test Procedure: Individual / Group

Education Level: Kindergarten B

OUR EXPERTISE

Psychological Assessment

INTELLECTUAL POTENTIAL TEST (IQ)

Definition: A psychological assessment used to measure cognitive abilities such as logical reasoning, problem-solving, verbal and non-verbal understanding, and numerical skills as an identification of academic potential.

Test Objectives:

- To help understand cognitive strengths and weaknesses for educational and career planning.
- To detect possible learning difficulties that may interfere with the learning process at school.

Test Procedure: Individual

Age Requirement: Minimum 4 years old

OUR EXPERTISE

Psychological Assessment

LEARNING DIFFICULTIES IDENTIFICATION TEST

Definition: A psychological evaluation assessment used to identify learning barriers that affect a student's ability to learn.

Test Objectives:

- To detect learning difficulties such as dyslexia, dysgraphia, and dyscalculia.
- To plan appropriate and effective interventions or support.

Test Procedure: Individual

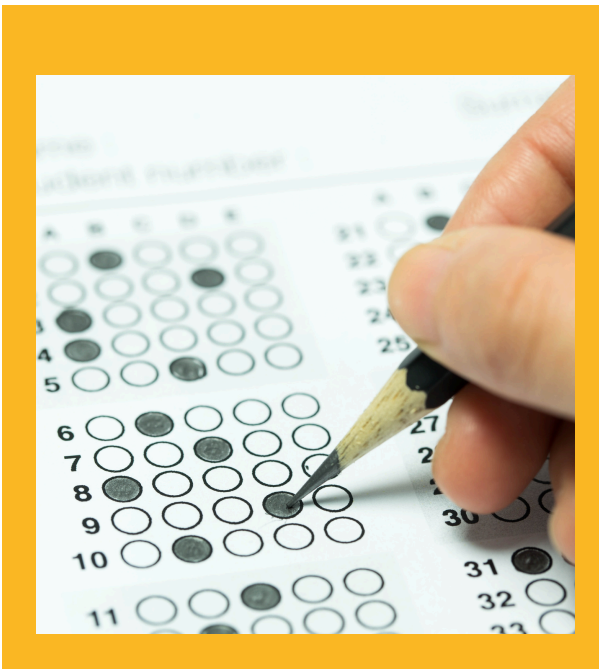

Age Requirement: Minimum 7 years old

OUR EXPERTISE

Psychological Assessment

INTEREST AND APTITUDE TEST

Definition: A psychological assessment used to measure a person's interests and talents (potential abilities), to help determine suitable school majors or career paths.

Test Objectives:

- To help individuals understand themselves better, including hidden potential, strengths, and weaknesses.
- To map possible study majors or career interests for the future.

Test Procedure: Individual / Group

Age Requirement: Minimum Grade 9

(We also provide interest and aptitude assessments for children with special needs, under certain conditions.)

OUR EXPERTISE

Counseling

We help children, adolescents, and adults overcome challenges related to developmental, social, emotional, motivational, trauma-related, and other psychological issues.

In each session, we provide not only counseling, but also mental health identification or screening when needed.

We also support parents in learning to understand and meet their children's psychological needs.

OUR EXPERTISE

Training/ Seminar

We provide training and seminars in collaboration with institutions for students, parents, and teachers.

Some of the topics we have covered include:

- Leadership & Life Skills
- Anti-Bullying Workshop
- Digital Citizenship
- Sexual Health Education
- Psychological First Aid for Teachers
- etc

OUR EXPERTISE

Psychological Consulting

We provide psychologist services to support institutions that want to offer psychological support for students, parents, and teachers.

This support can be provided in the form of on-site presence at schools for a certain period, continuous training for teachers, students, and parents, or consultation services to help build a school counseling system.
