See the new LEGOLAND ideas book.

The LEGOLAND ideas book has 84 colourful pages packed with instructions and ideas to start you off building heaps of new models for LEGOLAND Town, Space and Castle.

In LEGOLAND Town you get a new car every day.

The great thing about the LEGOLAND cars is that you can rebuild them differently time and time again. So it really is like having a new car every day.

LEGOLAND people can change too.

Just like the houses and cars of LEGOLAND, you can change the people too, swapping bodies, legs and hats to make all sorts of combinations. Their legs and arms move too, and they can grip things in their hands.

Now there are 4 different road plates for town planners.

LEGOLAND Town now has a new cross-roads plate. So there are 4 different kinds of roadplates to build your own town on curved roads, straight roads, - T-junctions and the new cross-roads.

Endless possibilities.

How to lay out the plates.

Put the LEGOLAND plates beside each other so that the roadways

match. You can lock the plates together by building over the junction or use just a single brick, tree or fence to do so.
