The city is built with various Technic bricks and beams, featuring yellow and green buildings, a large red and black structure with a yellow 'X' pattern, and a large black and blue mechanical structure in the foreground. A large, glowing yellow sun or moon is in the sky. In the top left corner, there is a circular logo with the word 'CYBERMASTER' in a metallic font. In the top right corner, there is a grey LEGO Technic suitcase with the word 'Technic' in a stylized font. In the center, there is a black box with the text 'LEGO Technic CYBERMASTER 8482' in white. In the bottom left corner, there is a LEGO Technic logo with the word 'Technic' in a stylized font. In the bottom right corner, there is a cartoon character of a man with a beard, wearing a red cap and a black jacket, holding a CD-ROM. The overall theme is a combination of LEGO Technic building and interactive technology.

Once upon a time there was a King called Alfred who lived in his castle, together with his daughter, Princess Rosa. From another Kingdom, far away, came Prince William, who had heard about the lovely Princess and wanted to meet her himself. Unfortunately along the way, he met wicked Madam Tussa the Witch who cast a magic spell on him which made him lose his memory. When he arrived at the Castle he could not remember who he was so they gave him a job in the stables as a Stable Boy. The story ends happily though because Fairy Millimi heard about what had happened and came along and broke the nasty spell...
