HSE POLICY

As main rules and condition in the work, our company drag big concentrate to the HSE Procedures and rules, to facilitate our client needs by establishing a safe working environment which complies with the health and safety relevant legislation.

It is important to us that we have procedures, plans and rules we apply in the work, such policy shows the commitment of AAC and the workers to the health and safety. it also aims to remove or reduce the risks to the health, safety and welfare of all workers, contractors and visitors, and anyone else who may be affected by our business operations.

Our priority in the work as HSE policy is to do what is necessary, moreover, what is need to apply the HSE Policy and the duties and responsibilities.

Also all employees should know where the first-aid kit is located, have a copy of the emergency plan and be trained on the emergency plan and evacuation procedures.

The employees in the company have the culture to commit in the HSE policy as they trained before they start the work, it also, we put training schedule which concern with the management, the commitment of the HSE Policy, we train the employees to remind them of the importance of such part. The Managing Director or Safety Advisor will ensure that all employees have access to the Health and Safety Policy. Each employee will be given a copy of the general policy on commencement of his or her employment.

We also focus on the risk assessment, how to mitigate the hazards, it will be undertaken for all members of staff, work activities and systems annually. It consists in identifying the hazards; identifying who might be harmed and how; evaluating the risks from identified hazards.

If there are no hazards, there are no risks. Where risks are already controlled in some way, the effectiveness of those controls needs to be considered when assessing the extent of the risk that remains.

The results of the risk assessments will be recorded in writing, and safety procedures adjusted to ensure adequate levels of health safety and welfare. The company also focus on the driving

guidelines and safe working practice as it is important aspect of the work.

Pre-Trip Inspection Checks.

Before any journey starts, pre-trip inspections are carried out to make sure that the load is thoroughly tied to the flatbed in order to avoid slipping from its position. Also , drivers have the responsibility to examine the whether the cargo is seated appropriately. Any violation in this regard will be taken very seriously. This is the summary of the HSE policy as we have booklet separated from this C.V.

Please visit our website for more information concerning the HSE Policy.

Refer to our old experience in supply food and catering to investment company during last seven years make us able to manage and active more than one way to achieve excellent delivery to our clients in any bad situation with food delivery from camp to camp.

مرفأ العاصمة

SUPPLY ***CHAIN MANAGEMENT***

Supply Chain Management **MARFAA ALASIMA** is the oversight of materials, information, and finances as they move in a process from supplier to manufacturer to wholesaler to retailer to consumer. Supply chain management involves coordinating and integrating these flows both

within and among companies. It is said that the goal of any effective supply chain management system is to reduce inventory (with the assumption that products are available when needed).

Supply chain management flows can be divided into three main flows:

The product flows

The information flows

The finances flow

TRANSPORTATION

Diesel-Black Oil-Bitumen D6 & Jp54
