Gut acting organic acid blends-sustainable non antibiotic growth promoter

Drinking water & Intestinal pH regulator

Protein digestion improved

# Anicid<sub>L</sub>

## The most suited water and gut acidifier powered by oligodynamics technology

### HOW IT WORKS?

#### 1.

##### Organic acids

Formic acid, Propionic acid, Citric acid, Lactic acid, Benzoic acid, acetic acid

- Controls gram negative gut pathogens.
- Benzoic acid- causes systemic acidification
- Improves protein digestion

#### 2.

##### Inorganic acid

Orthophosphoric acid

- Controls Clostridium and keeps check on Necrotic Enteritis

#### 3.

##### Oligodynamics

Ionic copper

- Kills non specifically gram positive and gram negative microbes in water and gut
- Favors the growth of probiotics in the gut

### Composition

Formic acid, citric acid, acetic acid, lactic acid, fumeric acid, benzoic acid, orthophosphoric acid, ionic copper

### Unique features

- Maximized acid content- most suitable to manage gut health
- Unique combination of organic acid, inorganic acid and ionic copper
- Bactericidal in action

More powerful—more intense—to reduce bacterial load in water and gut

### Usage recommendation

- 1mL/ 3 to 4 L of water. Inclusion depends on the initial pH of the water and TDS present in the drinking water. Please measure the water parameter before calibration

### Key benefits

- Stabilizes gut pH
- Improves peptic digestion
- Controls common gut pathogens including Salmonella & Clostridium
- Improves gut immunity- empowers gut epithelial to fight against gut pathogen and favours probiotic growth

### Shelf life

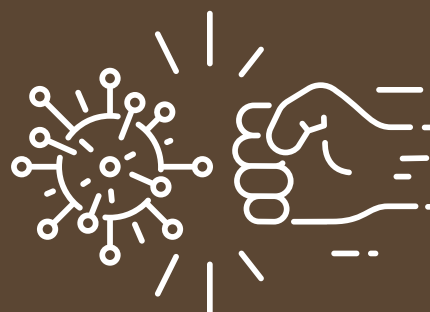

2 years from the month of manufacturing

### Storage condition

Keep in cool & dark place. Keep away from direct sunlight

### Presentation

1 L, 5L and 25L pack
