

Turmol

Potentiates gut health and feed color

ZOO TECHNICAL

www.animaxius.com

Feed colouration- increases the yellow hue of the feed

Gut health- reduces gut inflammation and oxidative stresses

Yolk colour- helps in yolk colour development

Turmol

A value added turmeric oil rich in active curcumin extract

HOW IT WORKS?

1. CURCUMOID

Adds Yellow hue to feed and makes feed more appealing.

2. Demethoxycurcumin (DMC)

Offers antioxidant properties in the gut.

Anti-inflammatory effects- reduces the gut infection and leaky gut conditions.

Antimicrobial activity- reduces gut pathogens load and improves the gut health

3. Bisdemethoxycurcumin (BDMC)

Acts as more potent antioxidant, anti-inflammatory, antibacterial and immunomodulator.

Potentially improves the performance and meat quality of the chicken

Turmon is formulated with phytochemicals rich in curcumoids essentially harvested from lakadong turmeric. It is a value added turmeric oil rich in curcumin, demethoxycurcumin and bisdemethoxycurcumin.

Composition

Each kg contains

Total curcuminoid not less than 12.5%; out of which curcumin min. 9.5%, Demethoxycurcumin 2.0% and Bisdemethoxycurcumin. TURMISHIELD is fortified with gut acting polyphenols.

Key features

Easy to apply - easily mixed with oil and can be added in mixer during feed manufacturing Higher concentration of bioactive curcuminoid - demethoxycurcumin and bisdemethoxycurcumin

Key benefits

Develops yellow hue of the feed and acceptable flavor Offers antimicrobial, antibacterial and anti viral properties Improves gut health, immunity Improves carcass trait and egg quality in layer

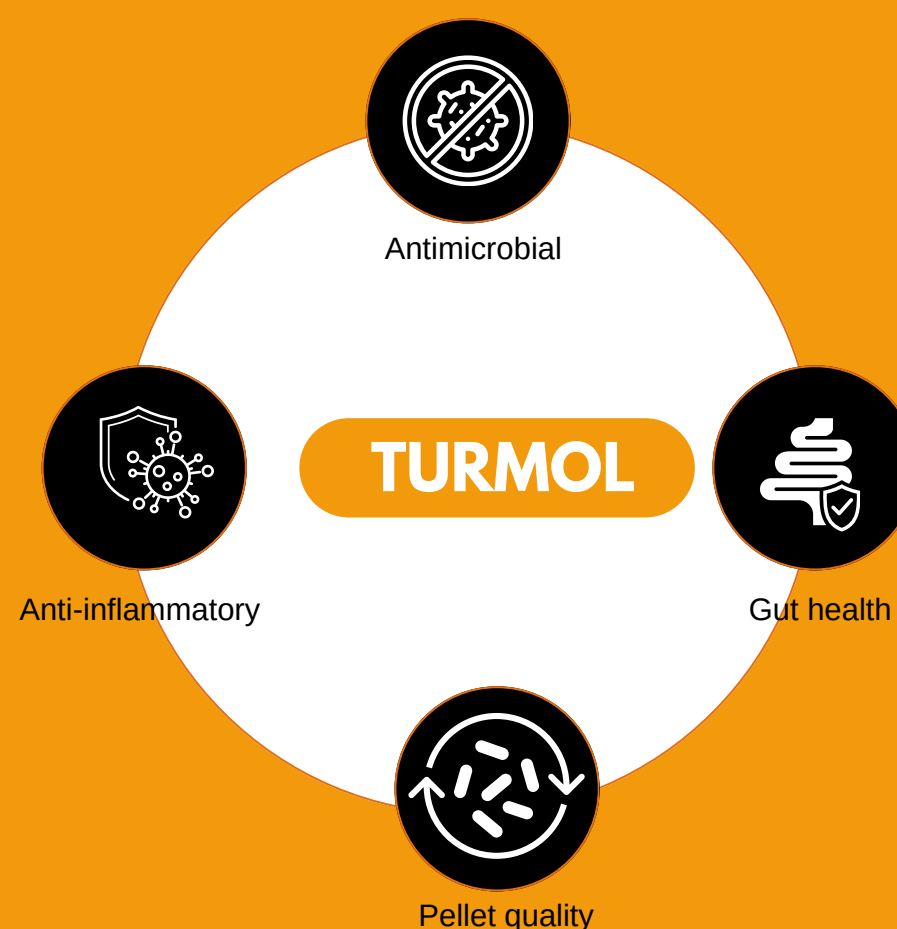

Usage recommendation

- Poultry feed: 500 g to 1kg per ton or as recommended by nutritionist

Presentation

- 25 KG BUCKET

Major benefits

Manufactured and marketed by

Animaxius
