GG FEARN ANNOUNCES NEW SINGLE PARASITE — OUT 31 OCT

Parasite — where intimacy is infection.

Dark-pop artist **GG Fearn** returns with her haunting new single *Parasite*, out 31 October 2025. Known for her cinematic sound and visceral lyricism, the Welsh artist sharpens her focus on cycles of intimacy, power, and dependence in a track that blurs the line between connection and contagion.

Following her debut EP *Black Mirror* — praised by **BBC Wales** for its exploration of identity — and her full-length soundtrack *The Mill Killers*, *Parasite* dives deeper into GG's dark alt-pop world. Her last single *Permanent Record* marked her as an emerging artist to watch, while recent live performances supporting **The Blockheads** and Whitney Lyman cemented her reputation as one of Wales' most compelling new voices.

Built on pulsing synths, eerie textures, and layered vocals, *Parasite* examines how care can mutate into control, and how the one depended upon becomes dependent in turn. Haunted by imagery of spores, roots, and hosts, its chorus is both unsettling and magnetic: a cinematic alt-pop anthem equally at home on a late-night playlist or a Halloween ritual.

Parasite will be available on all streaming platforms from 31 October 2025.
