How many Alphabet are there in Arabic?

There are scholarly differences about the total number of Alphabet in Arabic i.e if it's 28 or 29. This book sticks with the opinion that 29 Alphabet are there.

Let's get to
know them!

The Jeem brothers

Khaa

This is a short story of a guy named "Jeem" and his two brothers. They look the same so we've to separate them with the dots!

"Jeem" is a person who eats a lot so he always have food in his big tummy so "Jeem" will have dot inside it.

The next one is " Haa" who won't each much so he has no food in his tummy. "Haa" will look like his brother "Jeem" but without any dot in him!

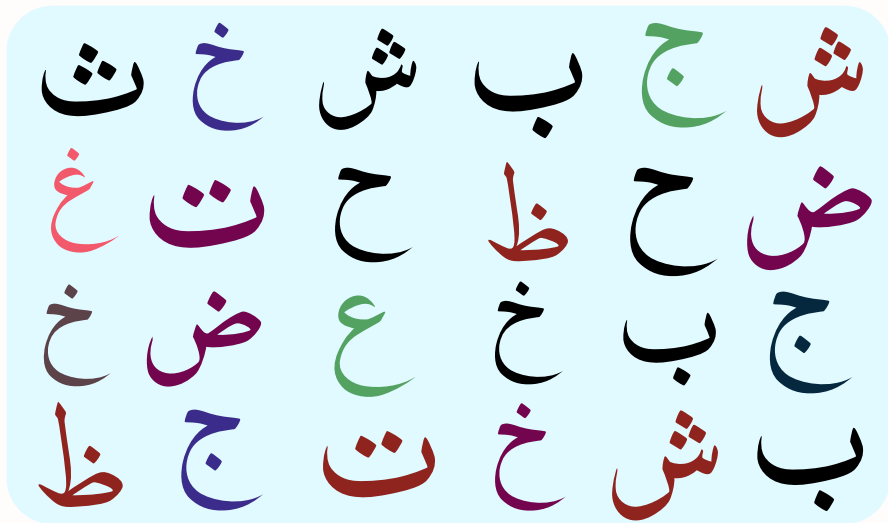

The last brother is "Khaa" who loves to wear a hat always on his head. He also looks like his brothers but he has a dot above his head.

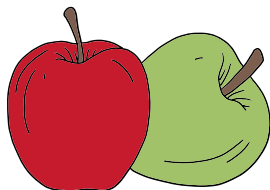

Find the 3 letters and write the total number of times each letter can be seen:

Each twin is a brother and sister. This is the house of "Daal" and "Dhaal". They both decided to go to the park with their neighbor twins "Raa" and "Zaa". After getting permission from their parents, they all left to the park joyfully.

On their way to the park, they met with another twins "Seen" and "Sheen" who were also going to the park. They all went together.

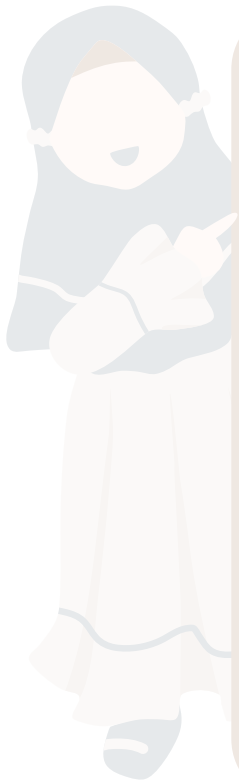

When they reached the park, they found three other twins playing there. They all introduced themselves to each other and started to play.

Once there lived a farmer "Faa" who was poor and old. Since he's poor, he decided to meet the king to ask for some help. He was going to the Palace.

Since it's so hot, he decided to take an umbrella with him. Since he is poor, his umbrella had only the stalk! And that's how letter "Laam" will look. He went to Meet (that's how letter "Meem" will be pronounced) the King (Kaaf) in the "Noon".

"Faa" was able to see the Palace from a distance
and he was amazed so much and exclaimed
"Wow"

Since "Faa" was walking for a long distance, he was so tired. After he reached the Palace, he was saying "Haa" because he was tired.

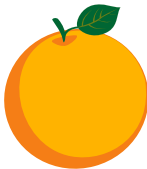

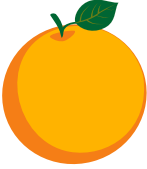

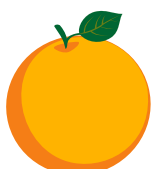

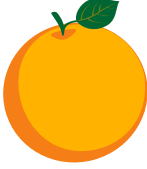

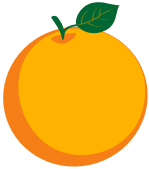

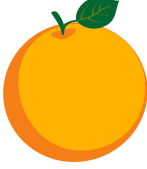

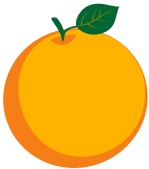

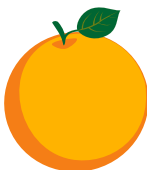

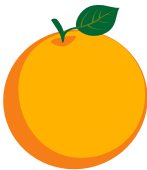

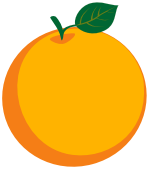

"Faa" saw a soldier in the Palace named "Hamza".
"Faa" told the soldier "Yaay, I've finally reached the Palace Alhamdulillah."

Since "Alif" is weak, he will always be seen with the soldier "Hamza"
