

2" x 2" #11 STENCIL

The top stencil is straight. The bottom stencil matches the exact angle of how this frame sits in the gallery. You've got options—use whichever works best for your design.

The solid black shapes show the areas that will be covered by a different frame/tattoo that lies on top of this one. Feel free to use those areas creatively or ignore them.

Guidelines: go full vibrant color. Subject should be a sexy girl or sexual in general. The outer frame needs to be a solid color that matches your palette (not black). No dudes, no dongs. Tits, nips, asses, and subtle pussies are fair game.

If you haven't checked out the inspiration page yet, hit it up—it's stacked with art I love and sets the overall vibe we're chasing for the back gallery, plus more details and options.

Note: my skin holds color really well—except white. White won't last. We can try, but odds are it's not sticking around.
