EXPERIENCE – SUMMARY

Vladimir Vencl is a professional in the construction industry with significant experience in procurement processes, contract management and claims, as well as dispute avoidance and resolution on large-scale construction projects. Having worked for various main contractors, subcontractors, employers, investors and consultants, he is acutely aware of the different perspectives that parties involved in the construction industry may have during the performance of their roles.

The projects he has participated in include major bridges, highways, regional roads, plants, residential, commercial, and railway projects, as well as various infrastructure works valued at over several billion EUR.

His involvement includes:

- Managing procurement processes from pre-qualification to contract award
- Preparation and negotiation of contractual terms
- Daily post-award contract management
- Preparation, negotiation, and determination of claims and variations (changes in scope of work)
- Representation of contracting parties before Dispute Boards (DB) and arbitral tribunals
- Serving as a quantum expert witness for claims in international disputes valued at several hundred million euros
- Acting as a Dispute Board member and arbitrator

Vladimir is experienced in managing various construction contracts based on FIDIC standard conditions, as well as various specific bespoke contract forms. Project funding sources include private investors, governments, and various international development organizations. His experience with entities from around the world contributes to his understanding of different cultural and business approaches to construction projects management.
