

## The Gold Standard in Aesthetic Dentistry

### Product Overview

IPS e.max crowns and veneers offer an exceptional combination of lifelike aesthetics and unparalleled strength, making them the premier choice for modern restorative and cosmetic dentistry. Engineered from innovative lithium disilicate ceramic, IPS e.max delivers reliable performance and stunning results that patients and clinicians alike can trust.

### Key Features and Benefits

#### 1. Superior Aesthetics

- Highly translucent material mimics the natural light diffusion of enamel.
- Available in a wide range of shades to match any patient's smile with precision.

#### 2. Unmatched Strength:

- Boasts a flexural strength of up to 500 MPa, making it ideal for anterior and posterior restorations.
- Resistant to fractures, chips, and wear, ensuring long-term durability.

#### 3. Versatile Applications

- Suitable for crowns, veneers, inlays, onlays, and thin veneers, offering flexibility across a variety of clinical cases.
- Can be used for minimally invasive preparations, preserving healthy tooth structure.

#### 4. Bio-Compatibility

- Metal-free ceramic material ensures excellent compatibility with oral tissues, reducing irritation and sensitivity.
- **Precision & Customization:**
- Fabricated with CAD/CAM technology for an accurate fit and flawless finish.
- Allows for highly detailed characterization to match the natural appearance of teeth.

## Clinical Benefits

- **Natural Beauty:** Delivers unparalleled aesthetics, blending seamlessly with adjacent teeth for a natural appearance.
- **Patient Satisfaction:** High translucency and lifelike properties boost patient confidence and acceptance.
- **Durability & Reliability:** High resistance to chipping and wear ensures long-term satisfaction and fewer replacements.
- **Predictable Outcomes:** Superior strength minimizes risk of failure, providing peace of mind for both patients and clinicians.

## Advantages for Your Practice

- **Broad Indications:** Ideal for single-unit restorations, full-mouth rehabilitation, and cosmetic enhancements.
- **Minimized Chairtime:** Precise fit and excellent marginal adaptation reduce adjustment and seating time.
- **Elevated Practice Standards:** Offer patients a premium restoration that reflects the cutting-edge of dental technology.
- **Enhanced Case Acceptance:** Patients are more likely to choose IPS e.max for its aesthetic and functional benefits.

## Partner with Us for IPS e.max Crowns & Veneers

With our expertise in crafting IPS e.max restorations, you can provide your patients with world-class solutions that redefine aesthetics and functionality. Trust us to support your practice with precision, reliability, and exceptional results.
