

Exceptional Restorations for Confident Smiles

At Digital Smile Innovations, we are committed to providing top-tier dental restorations that combine precision, aesthetics, and durability. Partner with us to deliver results you and your patients can trust.

Porcelain Fused to Metal (PFM) Crowns & Bridges

- **Durability Meets Beauty:** PFM restorations blend the strength of metal substructures with the natural appearance of porcelain, making them ideal for both anterior and posterior teeth.
- **Versatile Applications:** Perfect for single crowns, multi-unit bridges, and complex cases requiring functional and aesthetic excellence.
- **Customizable Metal Alloys:** Choose from high-noble, noble, and base metals to meet diverse patient needs and budget considerations.
- **Precise Marginal Fit:** Our skilled technicians ensure superior marginal integrity for long-lasting performance and reduced chairside adjustments.

Full Cast Crowns

- **Timeless Reliability:** Full-cast crowns remain the gold standard for durability, offering unmatched strength for posterior restorations under heavy occlusion forces.
- **Material Options:** From classic high-noble gold to cost-effective base metals, we tailor the materials to suit the specific clinical situation and patient preference.
- **Smooth-Polished Finish:** Engineered for superior comfort and reduced plaque accumulation, our crowns are crafted for optimal function and longevity.
- **Minimal Tooth Preparation:** These restorations require less tooth reduction, preserving natural tooth structure while providing a snug, accurate fit.

All-Ceramic Restorations (IPS e.max)

- **Unparalleled Aesthetics:** Made from advanced lithium disilicate glass-ceramic, IPS e.max restorations mimic the translucency and color of natural teeth, ensuring beautiful, lifelike results.
- **Versatility & Strength:** Ideal for crowns, veneers, inlays, on-lays, and even small bridges, with up to four times the flexural strength of traditional ceramics.
- **Metal-Free Solution:** Perfect for patients seeking metal-free restorations, offering both beauty and bio-compatibility.
- **Long-Lasting Performance:** Resistant to chipping and cracking, IPS e.max is engineered for high-stress-bearing areas, making it suitable for anterior and posterior applications.

Why Choose Digital Smile Innovations?

- **Craftsmanship You Can Trust:** Skilled technicians meticulously crafted each restoration using the latest technology and materials.
- **Customized Solutions:** We work closely with you to provide tailored restorations that meet the unique needs of your cases.
- **Fast Turnaround Times:** With streamlined processes, we ensure on-time delivery without compromising quality.
- **Exceptional Support:** Our team is here to assist with case planning, troubleshooting, and ensuring the best outcomes for your patients.
