Avoid stagnation and decline through social-libertarian reforms!

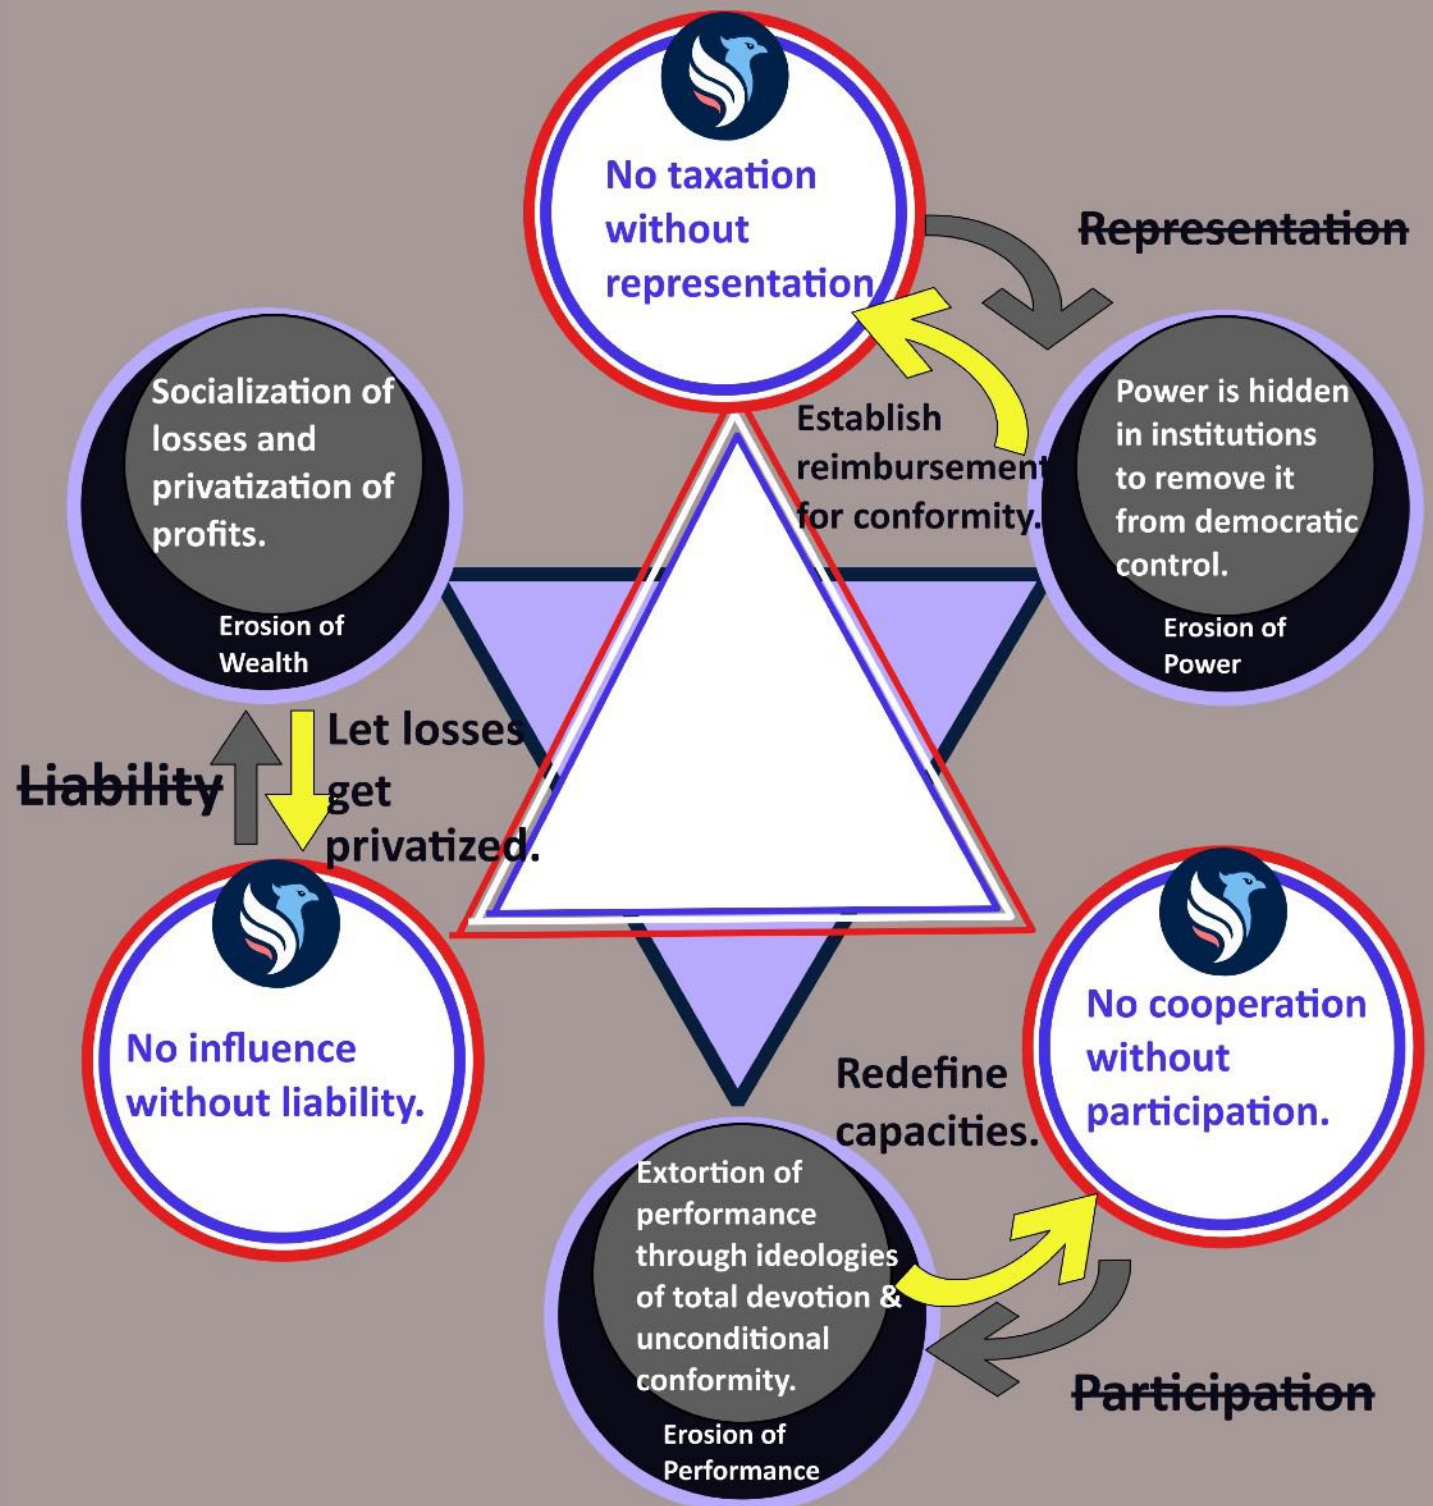

With the social-libertarian plan!

The Social-Libertarian Plan

A Good Life Under the Sun of Liberty

What left-reactionary rule leads to:

Choose the Good Life!

**You only have one
planet! Protect it
from eco-communist
ideas!**

Make the State the Right Size!

Restoring prosperity through sound fiscal design

The Laffer Curve - finding the sweet spot

The relationship between tax rates and tax revenues is not linear.

A 30% tax rate yields the highest level of production and total income - beyond that, both growth and efficiency decline.

When the state share exceeds the tax rate...

...it becomes unfinanceable.

The result: permanent debt expansion, disguised expropriations, or inflation.

Predictability in economic planning erodes - private investment stalls.

30% state share and a Spending-Ranking Law - and we're done!

Define three transparent creditor classes:

Those who get less than expected.

Those who get a little something.

Those who get almost nothing.

Hold a vote & get democratic consent for the most favored option

Make Capitalism Work!

Preserve capital through capital adjustments

Problem of insufficient employee motivation

due to high capital prizes & relatively low wages, resulting in weak growth and declining productivity – a path to bankruptcy.

Bankruptcy avoidance?

Pay producers first - just like startups do

90% of startups fail; high relevance of employee engagement.

Especially if you are an established company in a high-priced residential area

Companies in areas where the average annual income is less than one-third of the cost of a single-family home should be encouraged to behave like startups with regard to their capital structure.

- High employee equity participation (options), low investor participation.
- The latter usually remains at a maximum of 20%, after various funding rounds, despite providing the capital base.

Ordered by dysfunctional monopoly capitalists, delivered by the Left!

You buy 'saving the world' and an Antifa that doesn't set you on fire. You get: shortages, subsistence taxation, and concentration of capital.

We don't work for your odious debts!

Ensure the Moral Accountability of Creditors

Odious debts are not meant to be paid!

The jurist Alexander Nahum Sack established a general principle for dealing with debts incurred under repressive or colonial rule: they are odious and must be canceled; the moral responsibility of the creditors justifies the legitimacy of their loss.

In the 19th century, Mexico annulled the debts that had been incurred by Emperor Maximilian, because he had governed as a despot against the people, not for them.

Insist that preached social responsibility is personally practiced

For a strong partnership with China, North Korea, & Russia to oblige anyone with a primary interest in equity, inclusion, and status guarantees.

As a sign of their membership, followers of the movement greet each other by paying respect to the Freedom Falcon Loki:
A: "Ave Loki." B: "Ave Loki." In the presence of „non-flock-comrades“ the abbreviation "alo" is used.

Another greeting formula:

A: "How are the old bones doing?"

B: "Good, as long as the vultures don't eat them."

The social-libertarian idea is the idea of a non-partisan movement. On the road to freedom.

We are committed to protecting against ideas and institutions that monopolize power, drive up costs, and forget about the individual. Social-libertarian, instead of left-reactionary!

Only those who commit to freedom also commit to the future of the West.

The Freedom Falcons:
Together we are successful.

Security and confidence for all come only with integrity, not with violence.
