Our Service

CCTV Systems & Matrix

CCTV Surveillance System Since its inception, SPCC Surveillance has include success-fully installed CCTV Systems across all industries and types of environments.

This, etc. All the Industrial Factories + Offices, Retail Outlets, Supermarkets, Office Blocks, shopping Centre surveillance systems installed & maintained by SPCC are Digital

Our Service

Data Center

SPCC specializing in data centers , providing comprehensive solutions that include:

- Design: Designing data center infrastructure, including cooling systems, power, networks, and security, while adhering to the highest efficiency and reliability standards. Construction: Building and equipping data centers with
 - the latest technologies and equipment, according to global engineering specifications.
- Operation and Maintenance: Managing and operating data
 - centers , providing regular and corrective maintenance services to ensure continuous operation at maximum efficiency.

Our Service

Fire Alarm systems

One of the services available in SPCC is Fire alarm system. It consists of photoelectric, ionization smoke detectors and heat detectors, which are fully compatible with existing conventional panels and addressable systems and IP panels

Our Service

Fire Fighting Systems

Firefighting and suppression systems are designed to detect, control, and extinguish fires, protecting lives and property. These systems utilize various technologies, including:

- Suppression: Sprinkler systems, fire extinguishers, and gaseous suppression systems release water or other agents to extinguish flames.
- Control: Fire hydrants, standpipes, and firebreaks provide firefighters with access to water and limit fire spread.

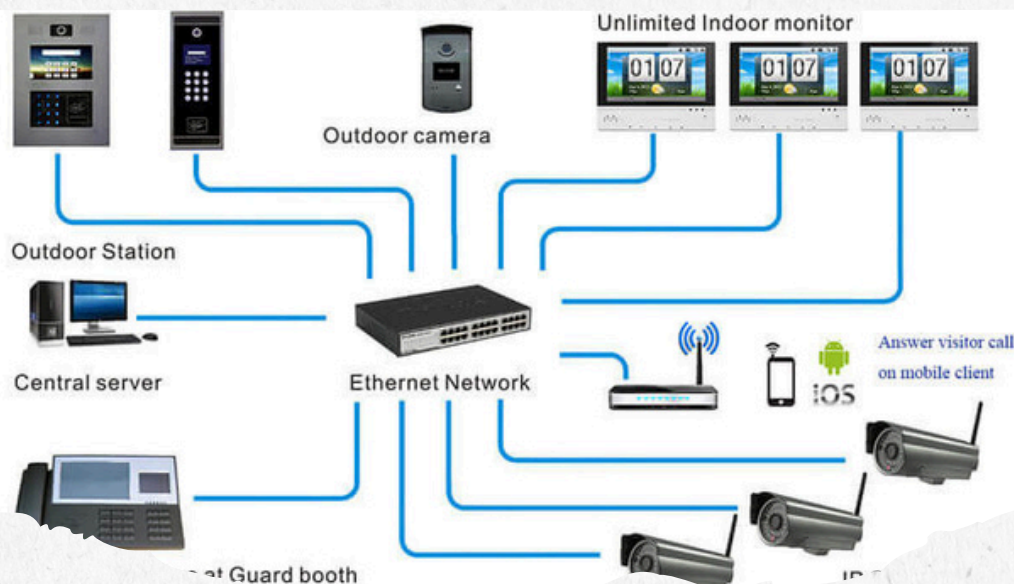

Effective fire protection requires a comprehensive approach, including prevention measures, early detection, and rapid suppression. Regular maintenance and testing are crucial to ensure these systems function reliably in emergencies

Our Service

Public Address – Evacuation System

In an emergency situation communication is vitally important. The public address and evacuation systems provide the facility for pre-defined audible warnings and announcements. The system can also be used for general information announcements.

Our Service

Intercom Systems

Intercom Systems are designed to provide facilities with communication into the occupants of a plant building. Audio devices are located throughout the plant or building ensuring effective communication to all areas.

Our Service

Stand Alone Access Control

For the facility that requires a stand-alone access control system. Designed to client specifications the system provides an effective means of controlling access to designated areas with the appropriate levels of security maintained.

Our Service

Asset Tracking Systems

A system, which provides management with the necessary tools to control assets within the organisation. Designated areas, through access points, are mentioned for assets being transported from one area to another by readers and tags attached to the asset. Assets can also be monitored for removal from fixed designated workstations or rates.

Our Service

Cloud Computing System

SPCC delivers comprehensive cloud computing solutions tailored to drive business transformation. We specialize in designing, implementing, and managing secure, scalable, and reliable cloud systems. hybrid/multi-cloud integration, and expert cloud consulting. We empower clients to optimize efficiency, reduce costs, and accelerate innovation through cutting-edge cloud technology.

BUILDING MANAGEMENT SYSTEMS

Our Service

BMS Solutions

"SPCC is a leading provider of Building Management System (BMS) solutions, offering comprehensive services that optimize building performance, enhance energy efficiency, and ensure occupant comfort. We specialize in the design, installation, integration, and maintenance of advanced BMS systems tailored to meet the unique needs of diverse facilities. Our expertise covers:

- Integrated BMS Solutions: Seamless integration of HVAC, lighting, security, and other building systems.
- Maintenance and Support: Proactive maintenance and 24/7 support to ensure system reliability.

Our Service

FTTH Sales-Installation

SPCC specializes in providing comprehensive FTTH (Fiber to the Home) solutions, encompassing both sales and installation services. We deliver high-speed, reliable fiber optic connectivity to residential and commercial clients. Our services include:

- FTTH Sales: Offering tailored fiber optic packages to meet diverse customer needs already taken from KSA telecom provider like STC - Mobily - Zain - Salam
- FTTH Installation: Expert installation of fiber optic infrastructure, ensuring seamless connectivity.
- Network Design & Implementation: Designing and deploying robust FTTH networks for optimal performance.
- Maintenance & Support: Providing ongoing support and maintenance to ensure network reliability.

SPCC is committed to delivering cutting-edge FTTH solutions that enhance connectivity and empower our clients with high-speed internet access.

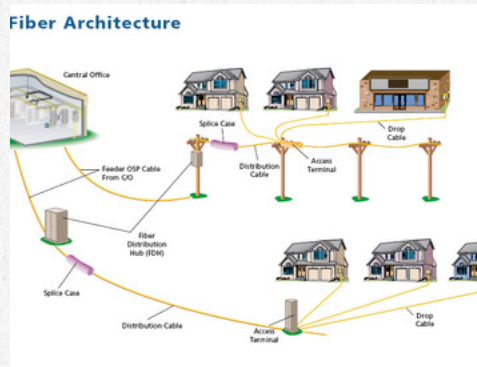

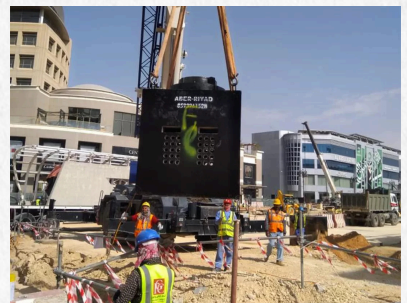

Our Service

FTTX OSP

SPCC specializes in delivering comprehensive Fiber to the X (FTTX) Outside Plant (OSP) solutions. We provide end-to-end services, from planning and design to installation, testing, and maintenance of FTTX networks. Our expertise includes:

- OSP Network Design: Planning and engineering of robust and scalable OSP infrastructure.
- Fiber Optic Cabling: Installation and splicing of fiber optic cables for high-speed connectivity.
- OSP Construction: Civil works, ducting, and manhole installation for OSP network deployment.
- Testing and Commissioning: Ensuring optimal network performance through rigorous testing and commissioning.
- Maintenance and Support: Providing ongoing maintenance and support to ensure network reliability.

SPCC is committed to delivering high-quality FTTX OSP solutions that enable seamless connectivity and support the growing demand for high-speed broadband services.

Our Service

Maintenance and Servicing Capabilities

SPCC has a standard call-out procedure for each system installed with 24-hour service. Endeavour affiants respond telephonically within the hour and on site within 24 hours of being notified. Quail Tatenda trained technicians would respond to the specific project with the necessary tools and stock to the fault(s), should the system require additional spares, these would be obtained within the shortest time required. Servicing of equipment is carried out by SPCC in-house Capabilities. Asset undertakes after sales service agreements and pride in the in-depth knowledge of its product of ours with central documentation for each project undertaken. Quality is an element of the attitude. Technicians that have been carefully nurtured and is evident in the compliments received from clients

Our Service

Smart Home Solutions

SPCC is a leading provider of innovative Smart Home Solutions, transforming residences into intelligent, comfortable, and secure living spaces. We specialize in designing and implementing customized smart home systems that integrate seamlessly with our client's lifestyles. Our services include:

- Home Automation: Control lighting, climate, entertainment, and appliances with ease.
- Security Systems: Advanced security solutions for enhanced home safety and peace of mind.
- Entertainment Systems: Immersive audio and visual experiences tailored to your preferences.
- Energy Efficiency: Smart solutions for optimizing energy consumption and reducing costs.
- Customized Solutions: Tailoring smart home systems to meet individual needs and preferences.

At SPCC, we are committed to delivering cutting-edge Smart Home Solutions that enhance convenience, comfort, and security for our clients."
