

# What is Remote Reiki Attunement

- **Remote Reiki Attunement** is a process where a Reiki Master initiates and attunes an individual to Reiki energy from a distance. This means that the attunement, which typically involves the transfer of Reiki energy and symbols, is conducted remotely rather than in person. The practitioner uses intention, visualization, and energy techniques to facilitate the attunement process.

## What Does Remote Reiki Attunement Include?

- **Energy Transfer:** The Reiki Master channels Reiki energy to the recipient from afar, facilitating the attunement process.
- **Symbol Activation:** The Master may send or activate specific Reiki symbols and energies remotely to enhance the recipient's ability to channel Reiki.
- **Guidance:** The Master provides instructions and guidance on how to integrate and use the Reiki energy received during the attunement.
- **Follow-Up:** The recipient may receive additional support or advice to help them fully understand and utilize their new Reiki abilities.
