

Brown in Nature

Abena was getting ready for a nature walk when she noticed something special. Her skin was a beautiful shade of **brown**! As she headed down the forest path, she began looking for other brown things in nature.

Along the way, Abena discovered rough **brown tree bark**, smooth **brown acorns**, and bumpy **brown pinecones** scattered across the ground. She even spotted **brown mushrooms** growing near a fallen log and rich **brown soil** beneath her feet.

The more she walked, the more shades of brown she found. Some were light brown, some were dark brown, and each one was beautiful in its own way.

Nature is filled with so many beautiful shades of **brown**!

Brown Counting Game

Look at the objects below. Go on a nature walk to see if you can find all of them!

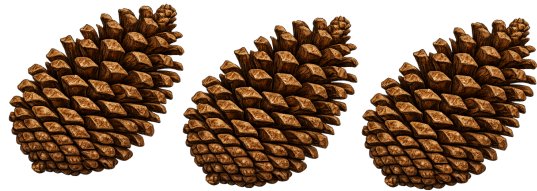

1 brown ant

2 brown mushrooms

3 brown pinecones

4 brown acorns

5 brown sticks
