

Green in Nature

Kofi loved exploring the outdoors. One bright morning, he grabbed his binoculars and set off on a nature walk to see what he could discover.

As he followed the winding trail, Kofi noticed green things everywhere he looked! Tall **green trees** stretched toward the sky, soft **green grass** covered the ground, and tiny **green frogs** hopped near the pond. He even spotted **green leaves** dancing in the breeze and **green moss** growing on a fallen log.

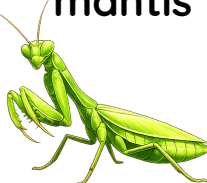

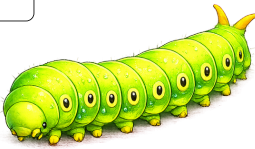

The farther Kofi walked, the more green treasures he found. Soon, he realized that nature was filled with beautiful shades of green all around him.

“Wow!” said Kofi. “There are so many green things to discover in nature!”

GREEN SCAVENGER HUNT

Can you help Kofi find green things in nature?
Go on a nature walk and see how many green
items you can find. Check off each one as you
discover it!
